

**CO-
HAB
RAVAL**

FIRST PHASE. EXISTING SPACES

Site visits and fieldwork in El Raval neighbourhood

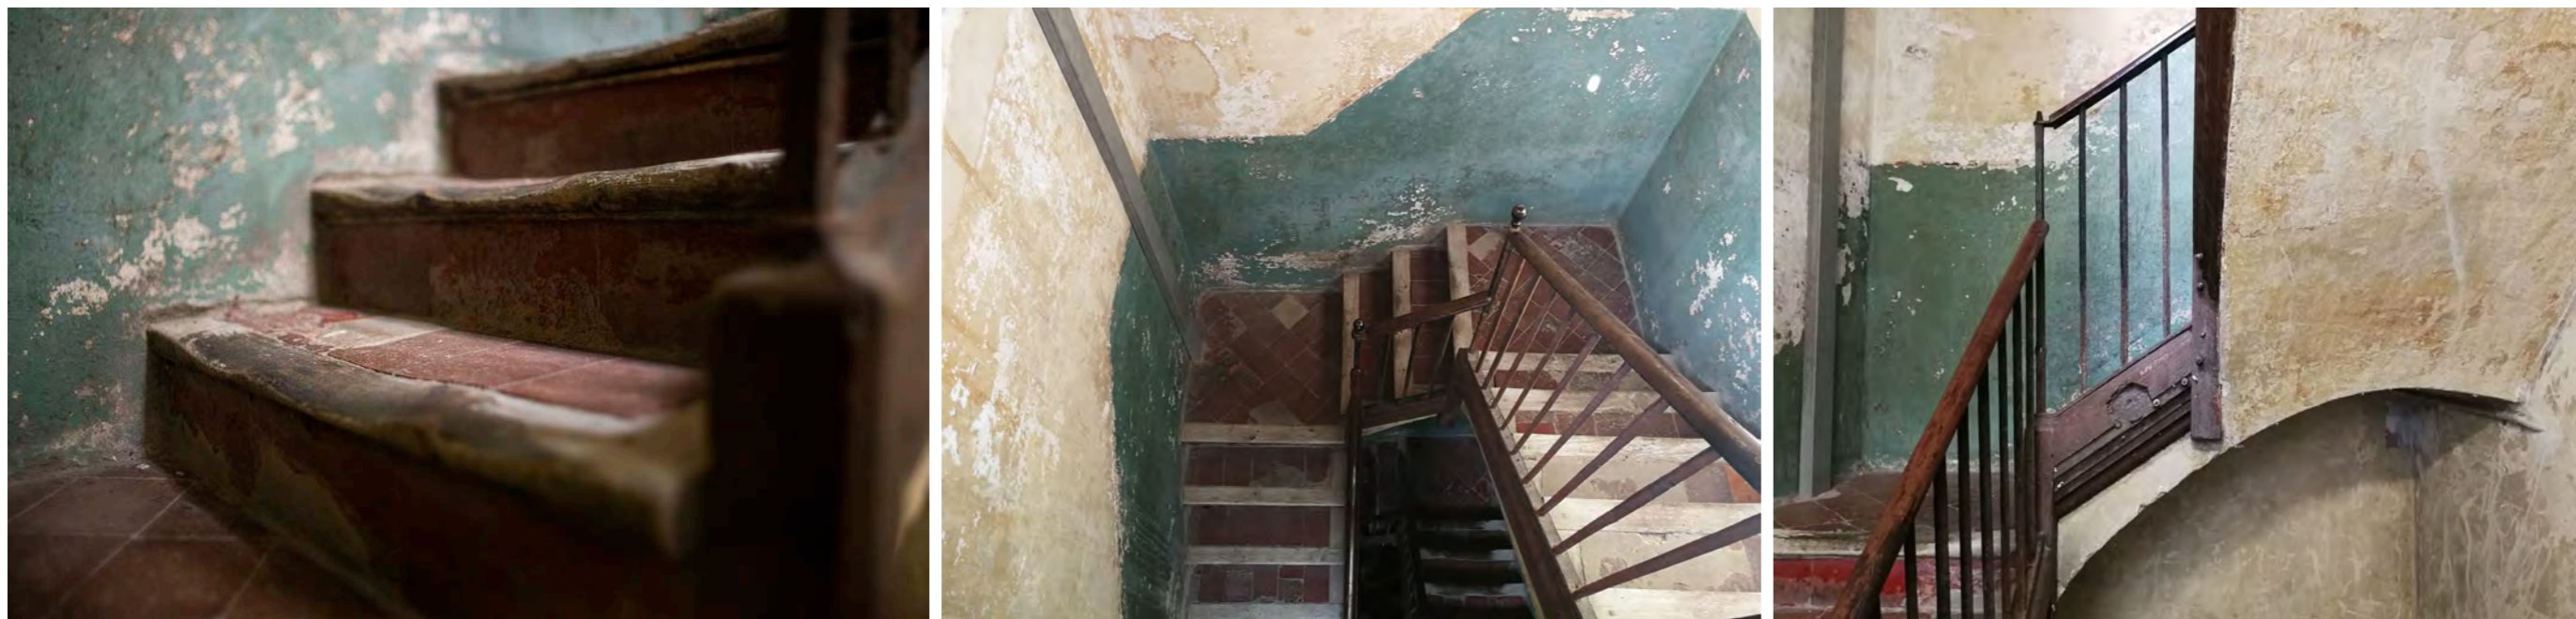

Site visits and fieldwork with the Focus Group

Detection of needs and evaluation of common damages in shared spaces

SECOND PHASE. CO-DESIGN

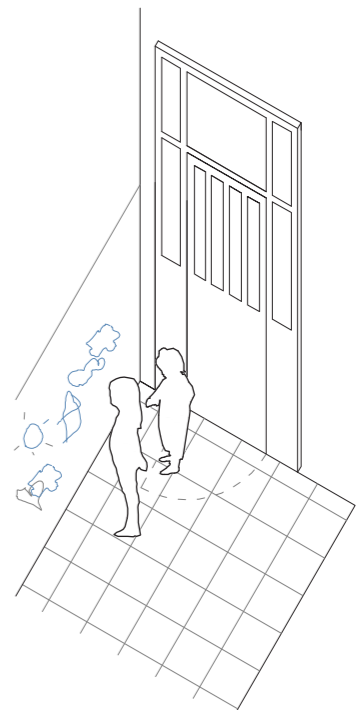

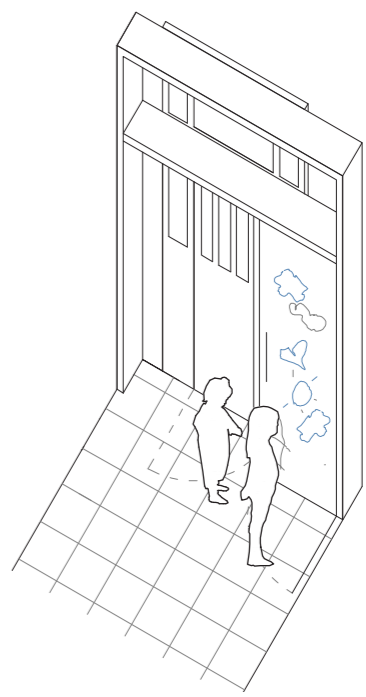

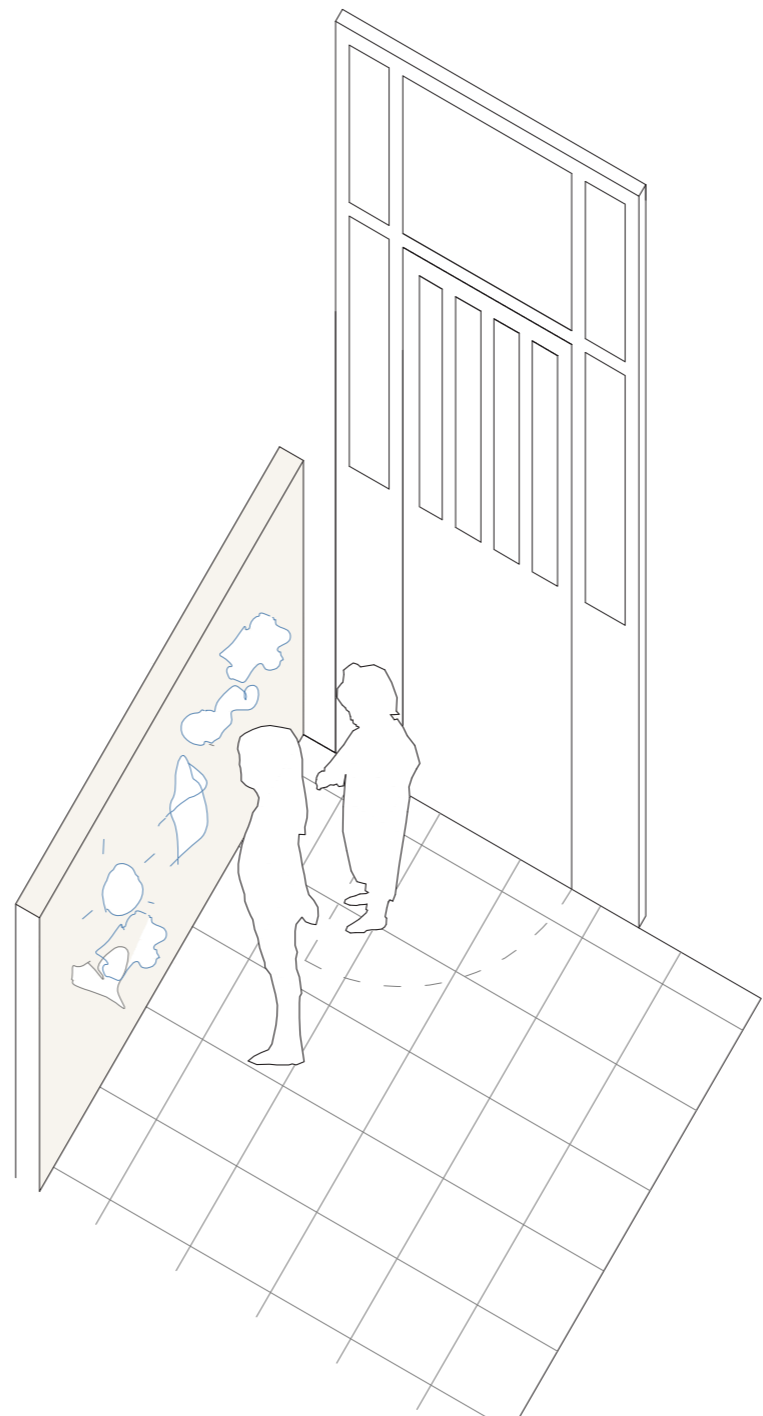

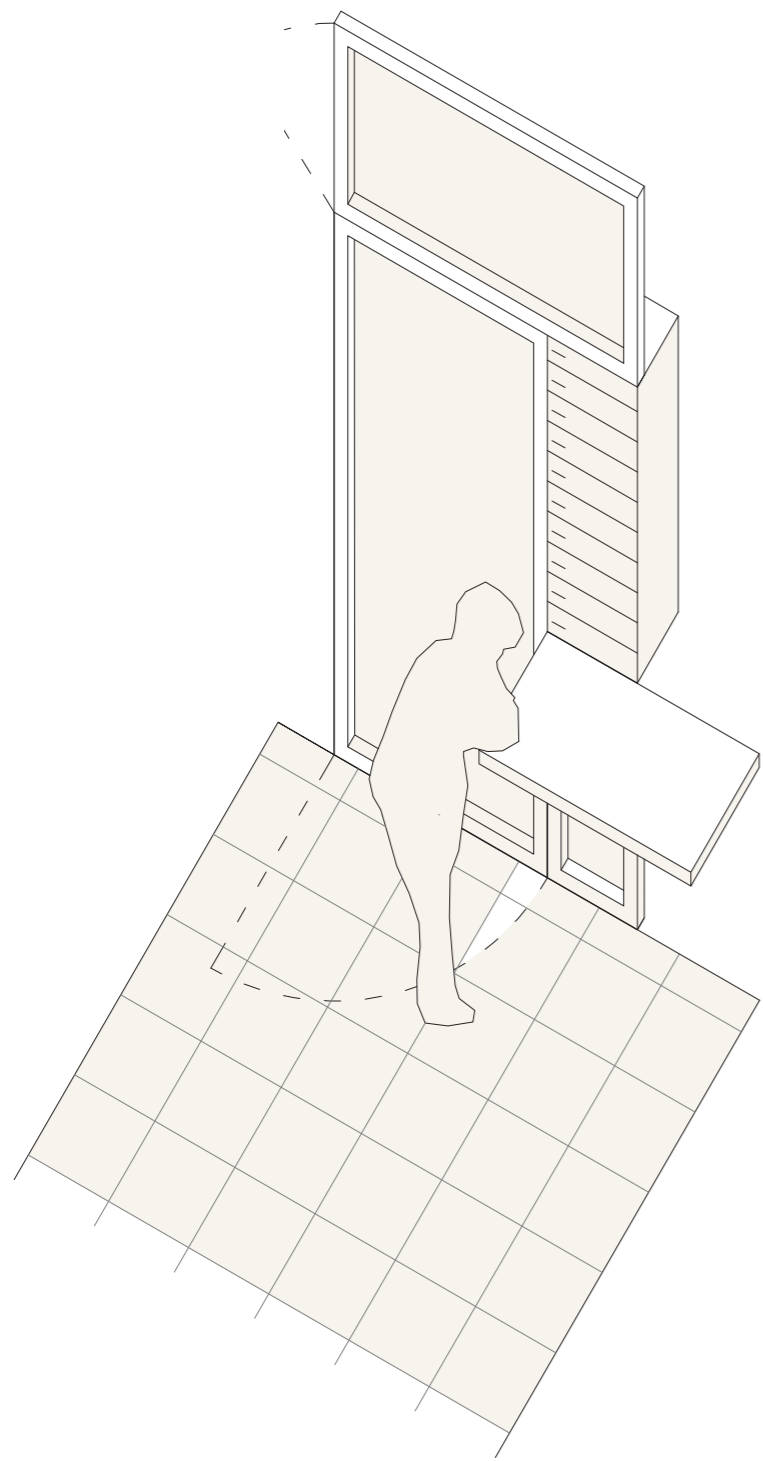

Preparation and assessment of a Catalogue of micro-projects with residents

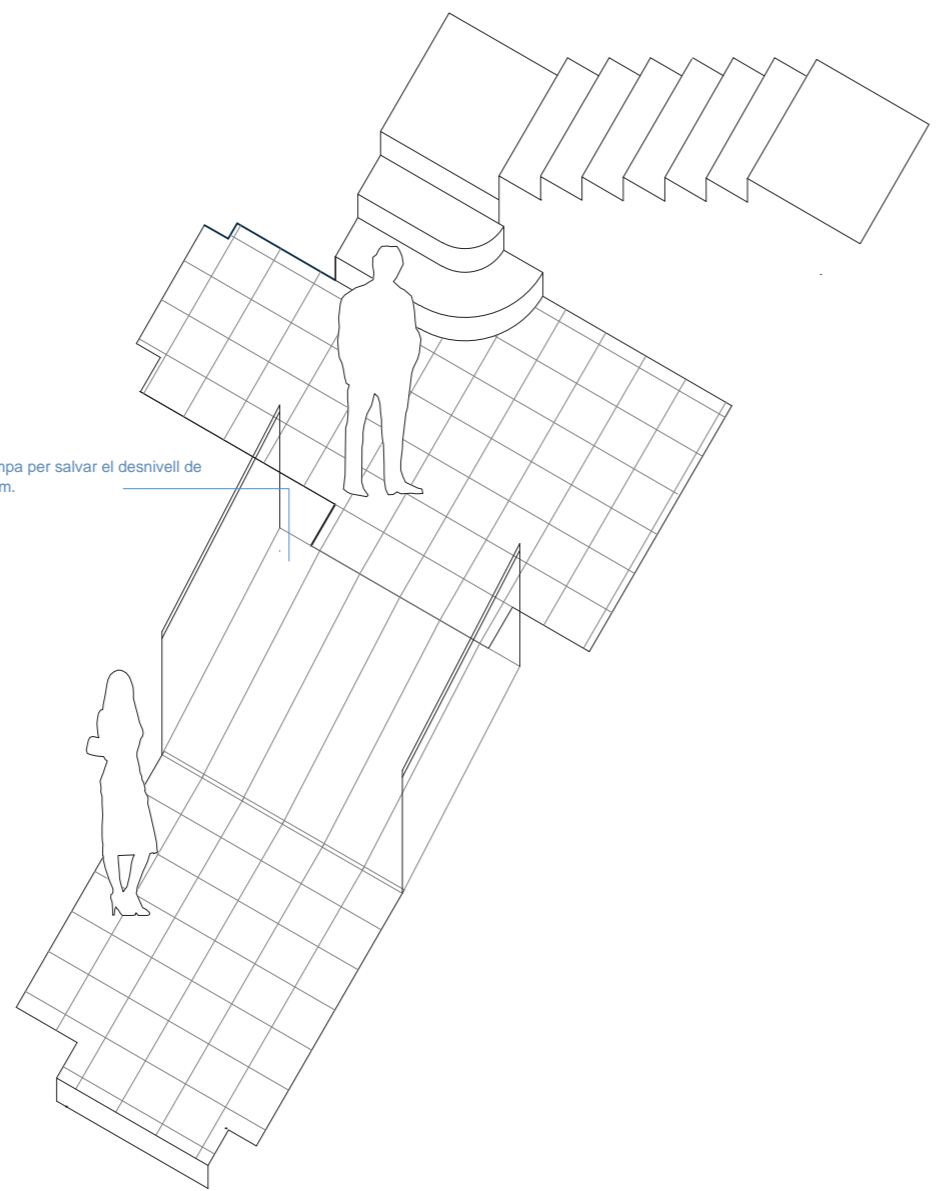

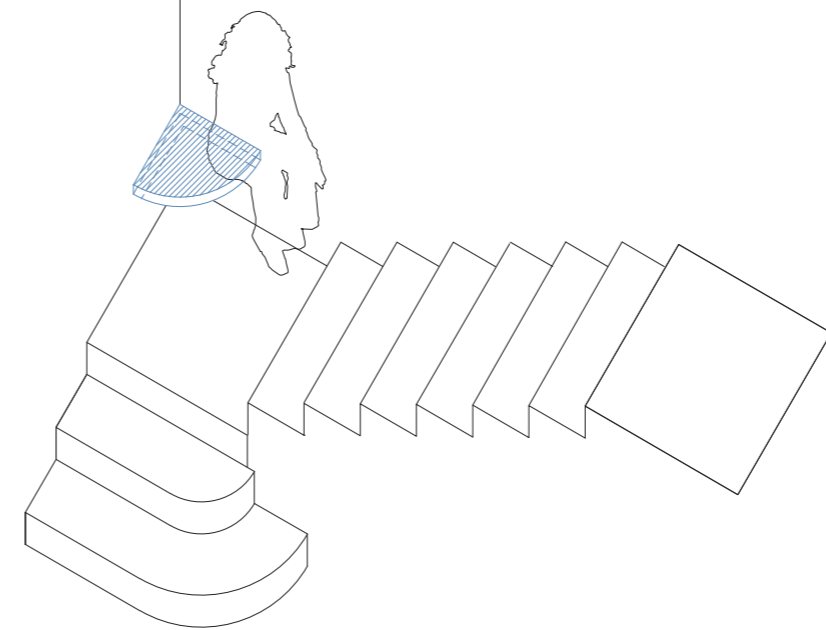

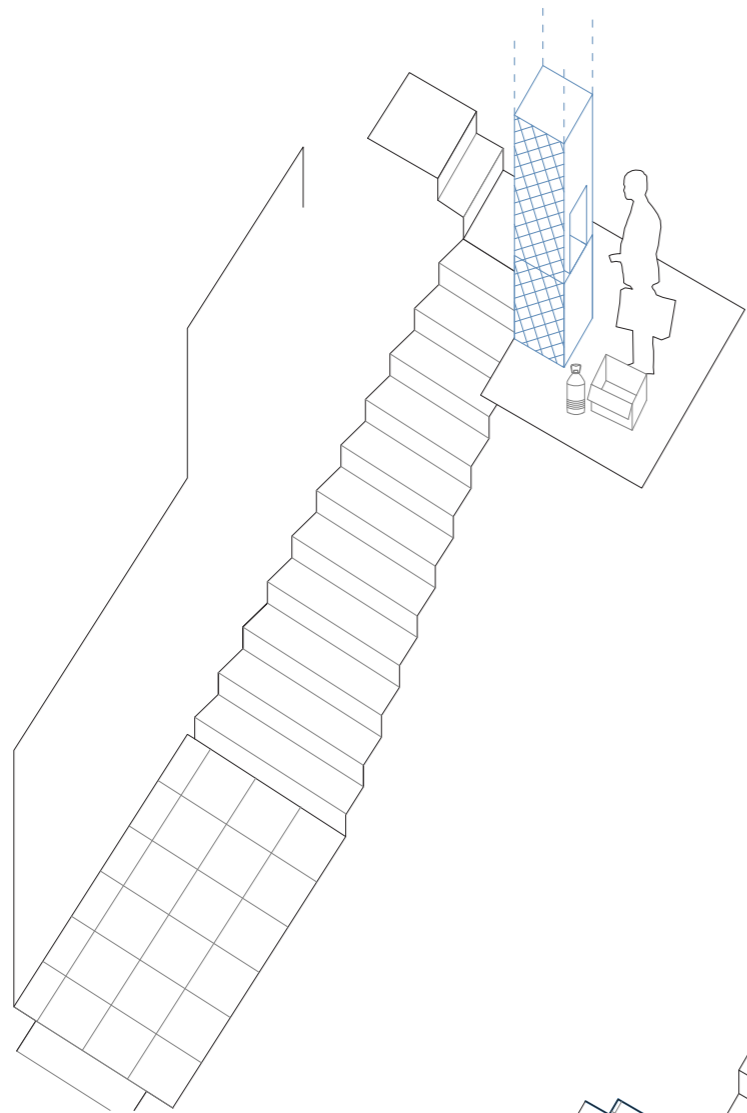

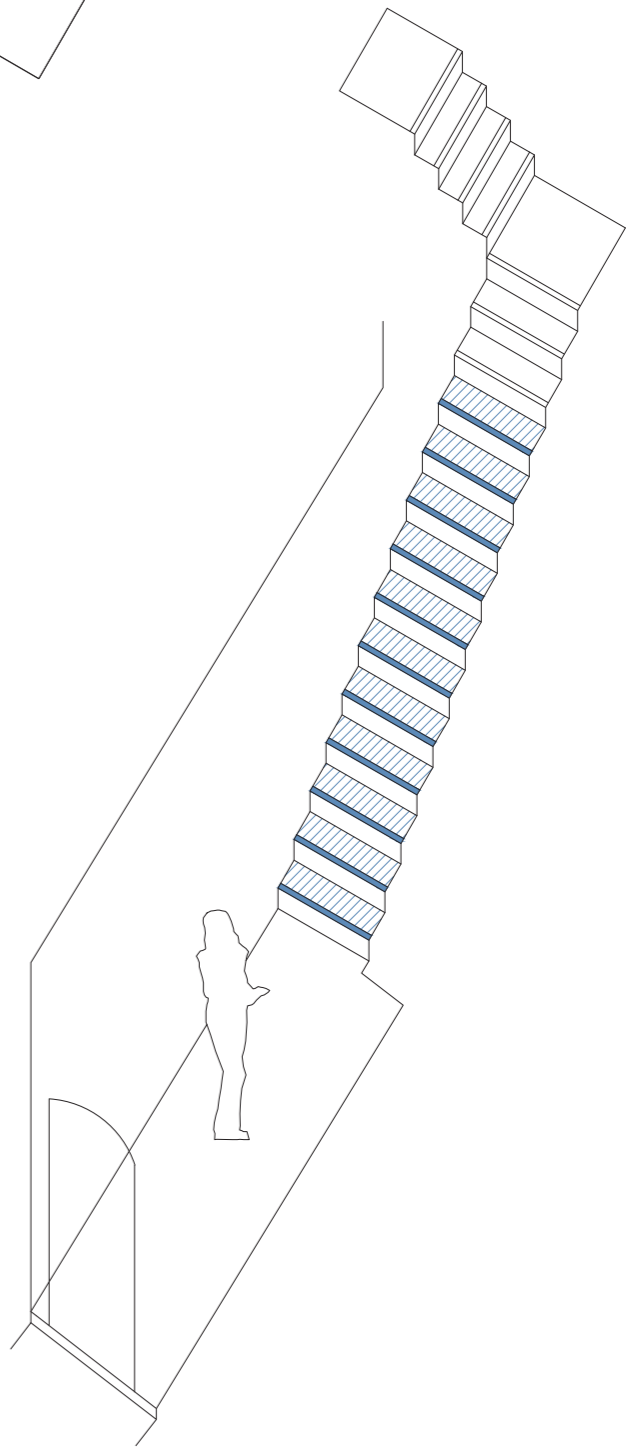

Participatory processes with neighbours

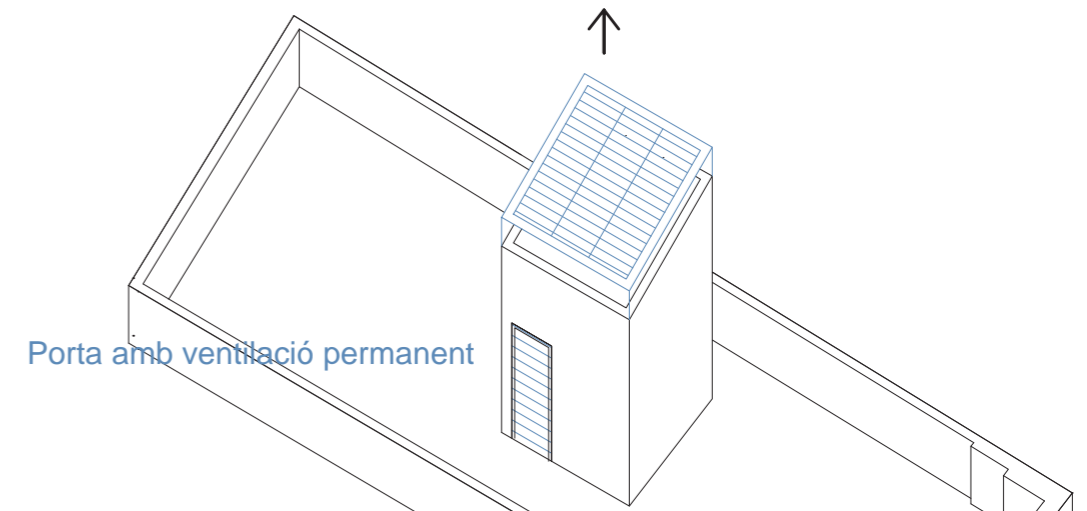

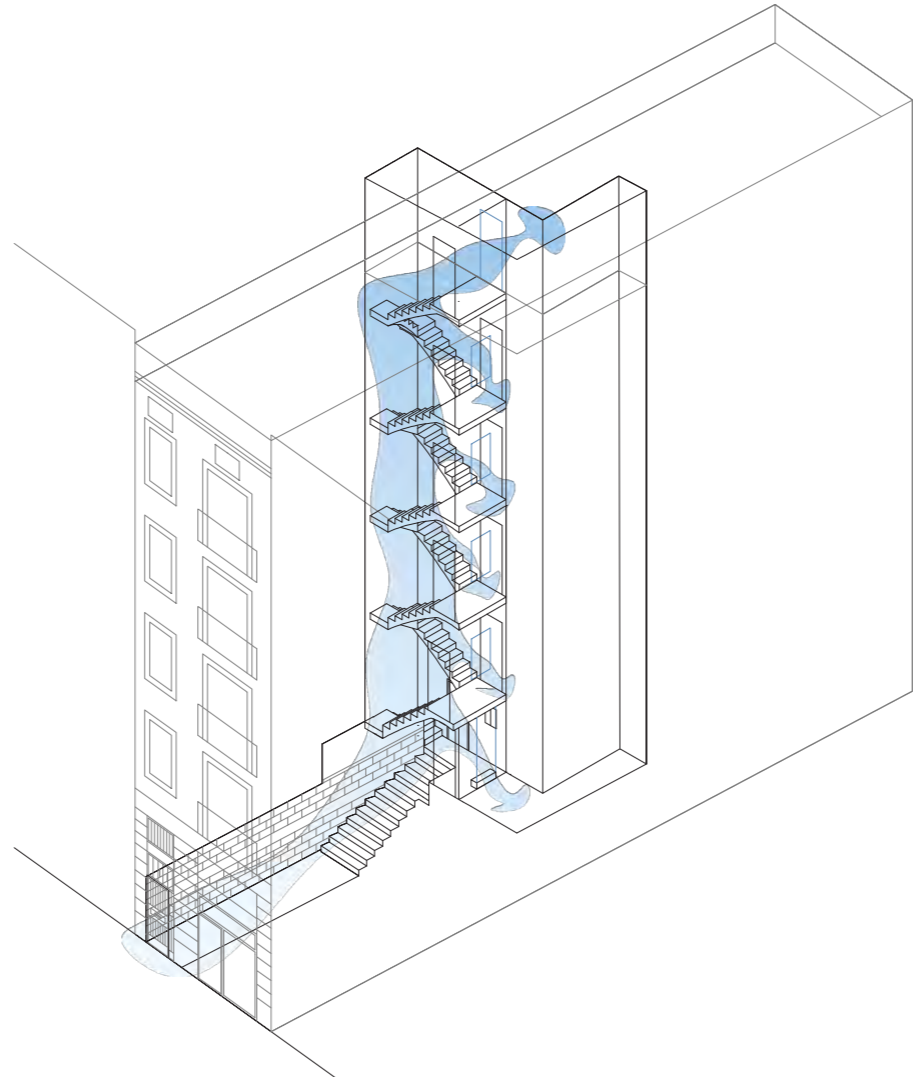

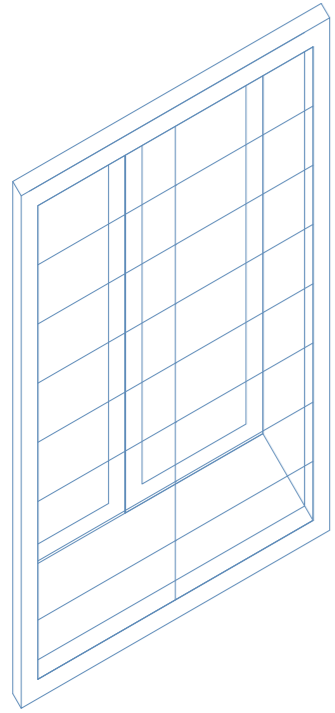

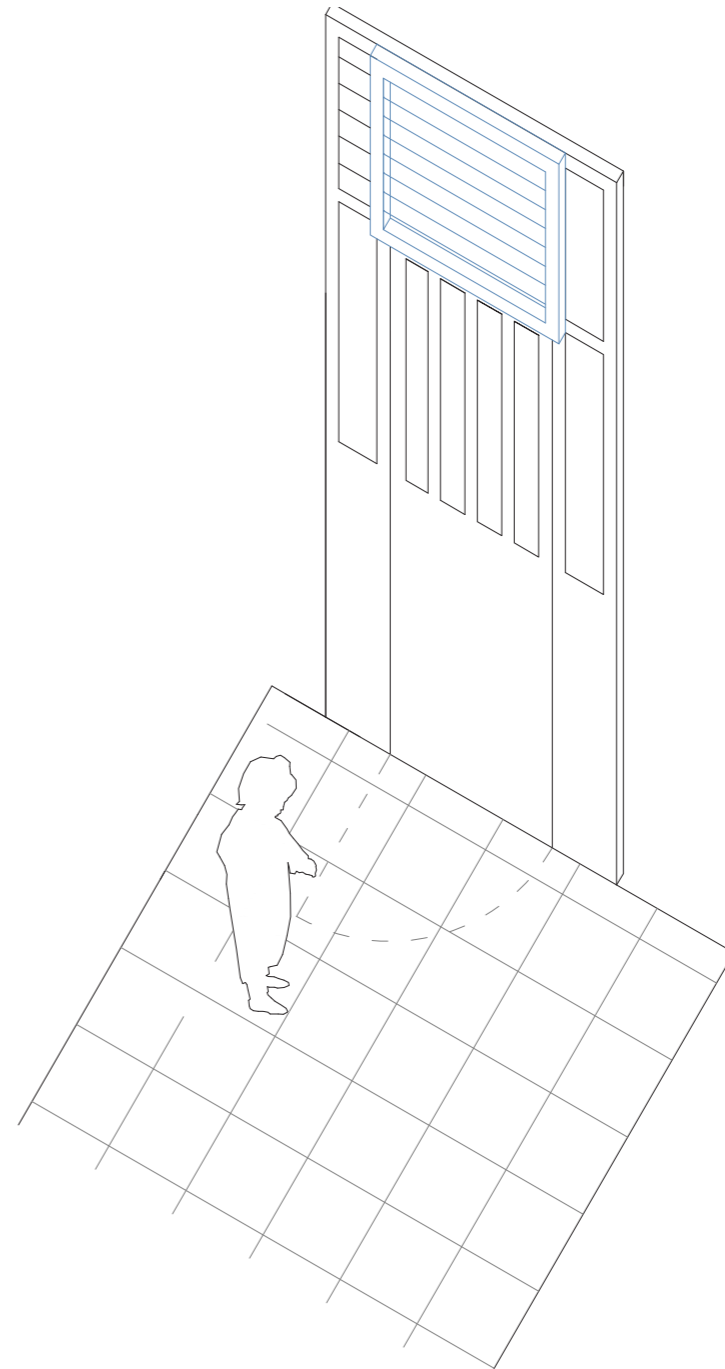

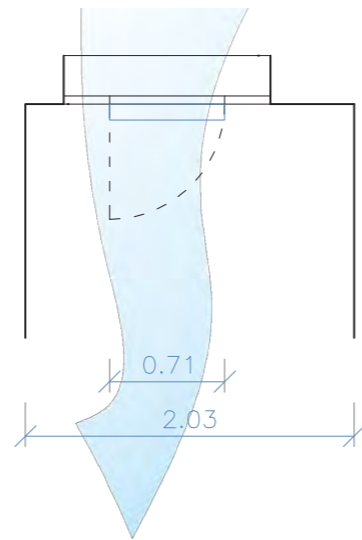

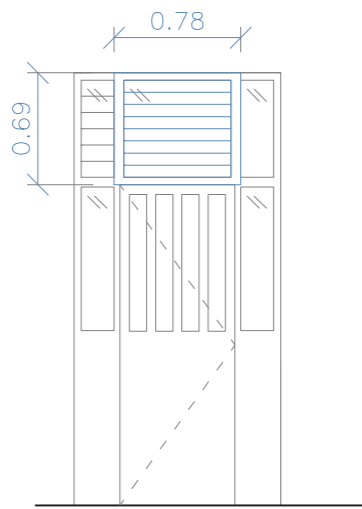

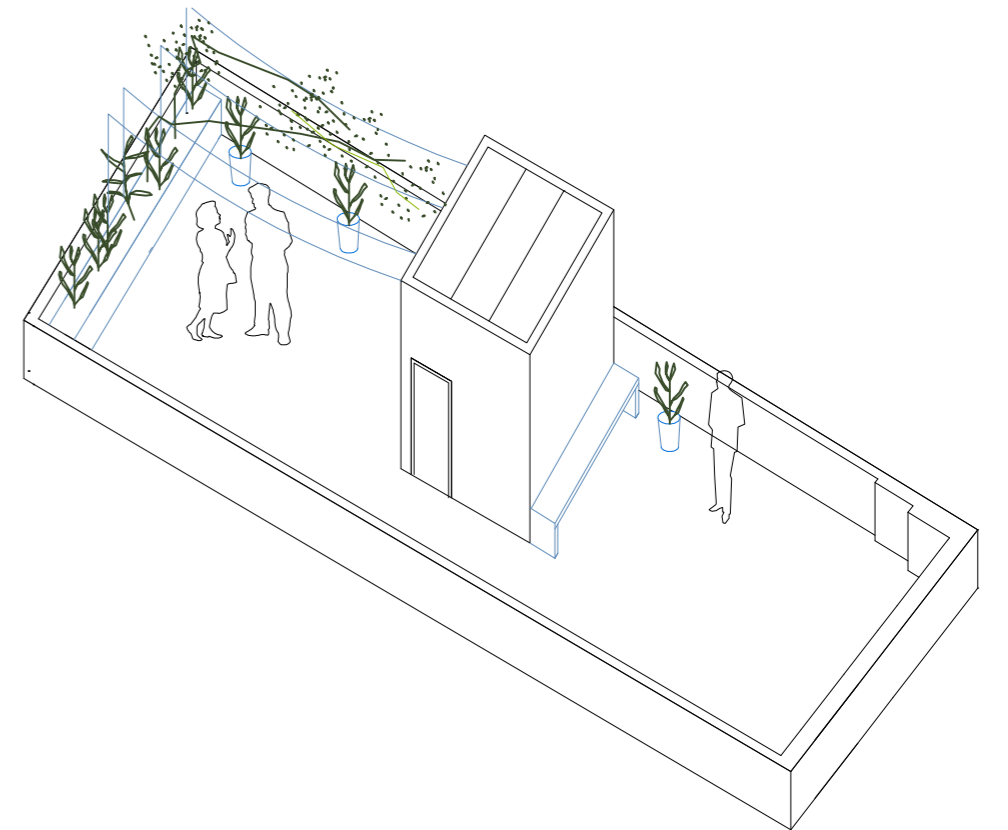

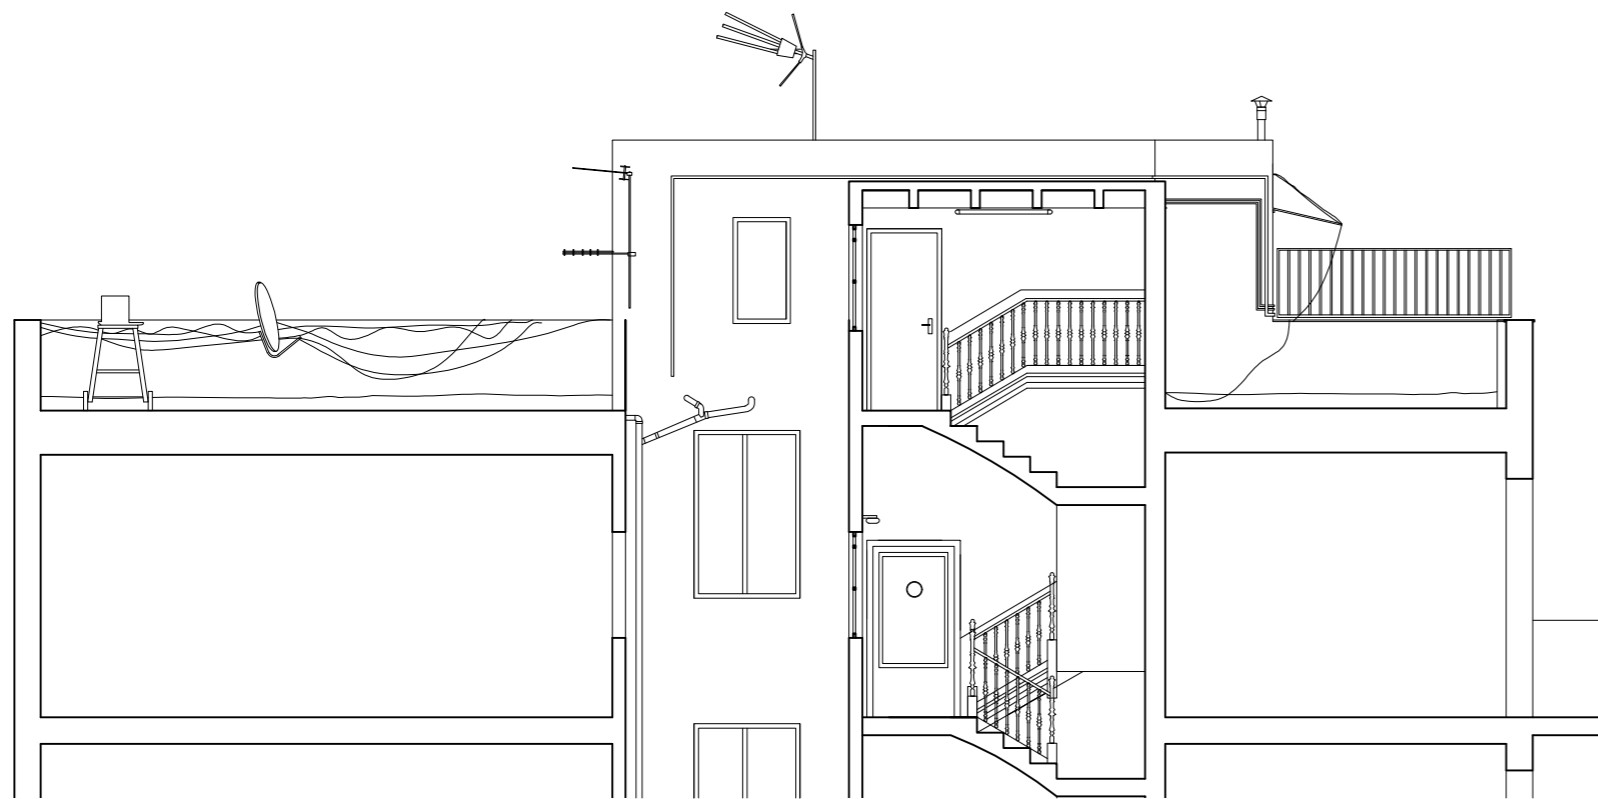

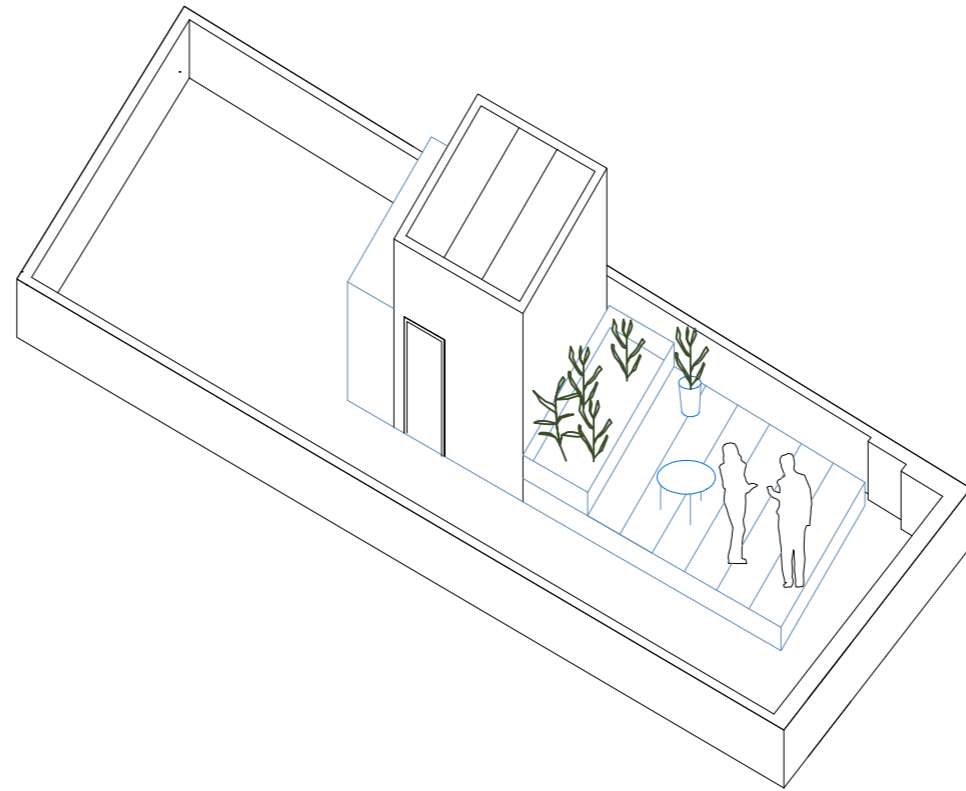

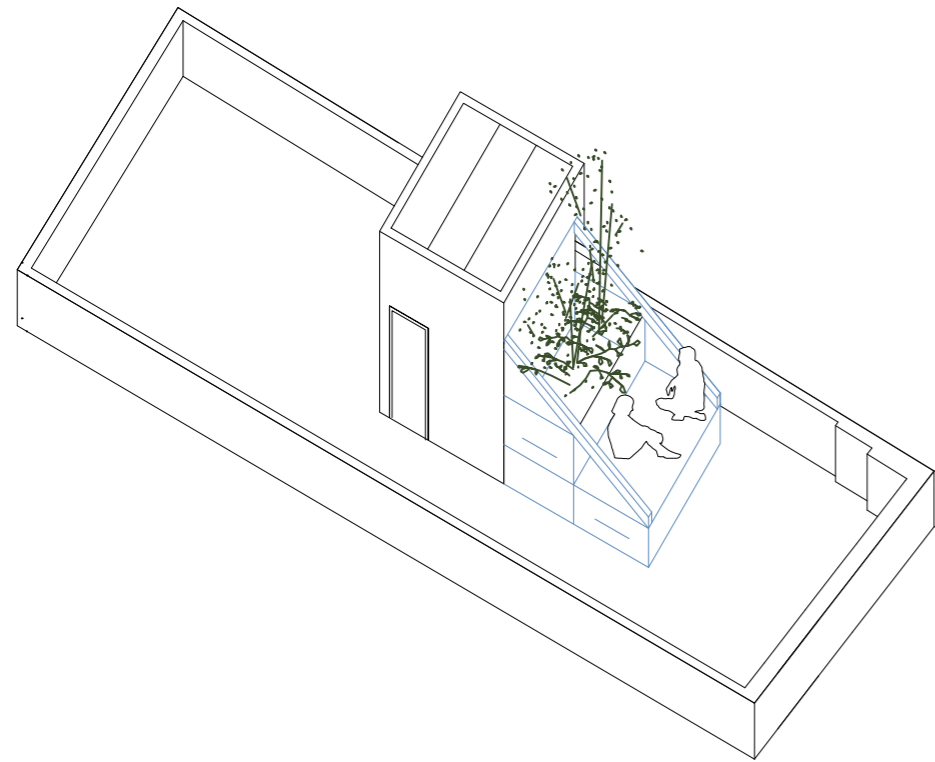

Rampa per salvar el desnivell de 20cm.

Porta amb ventilació permanent

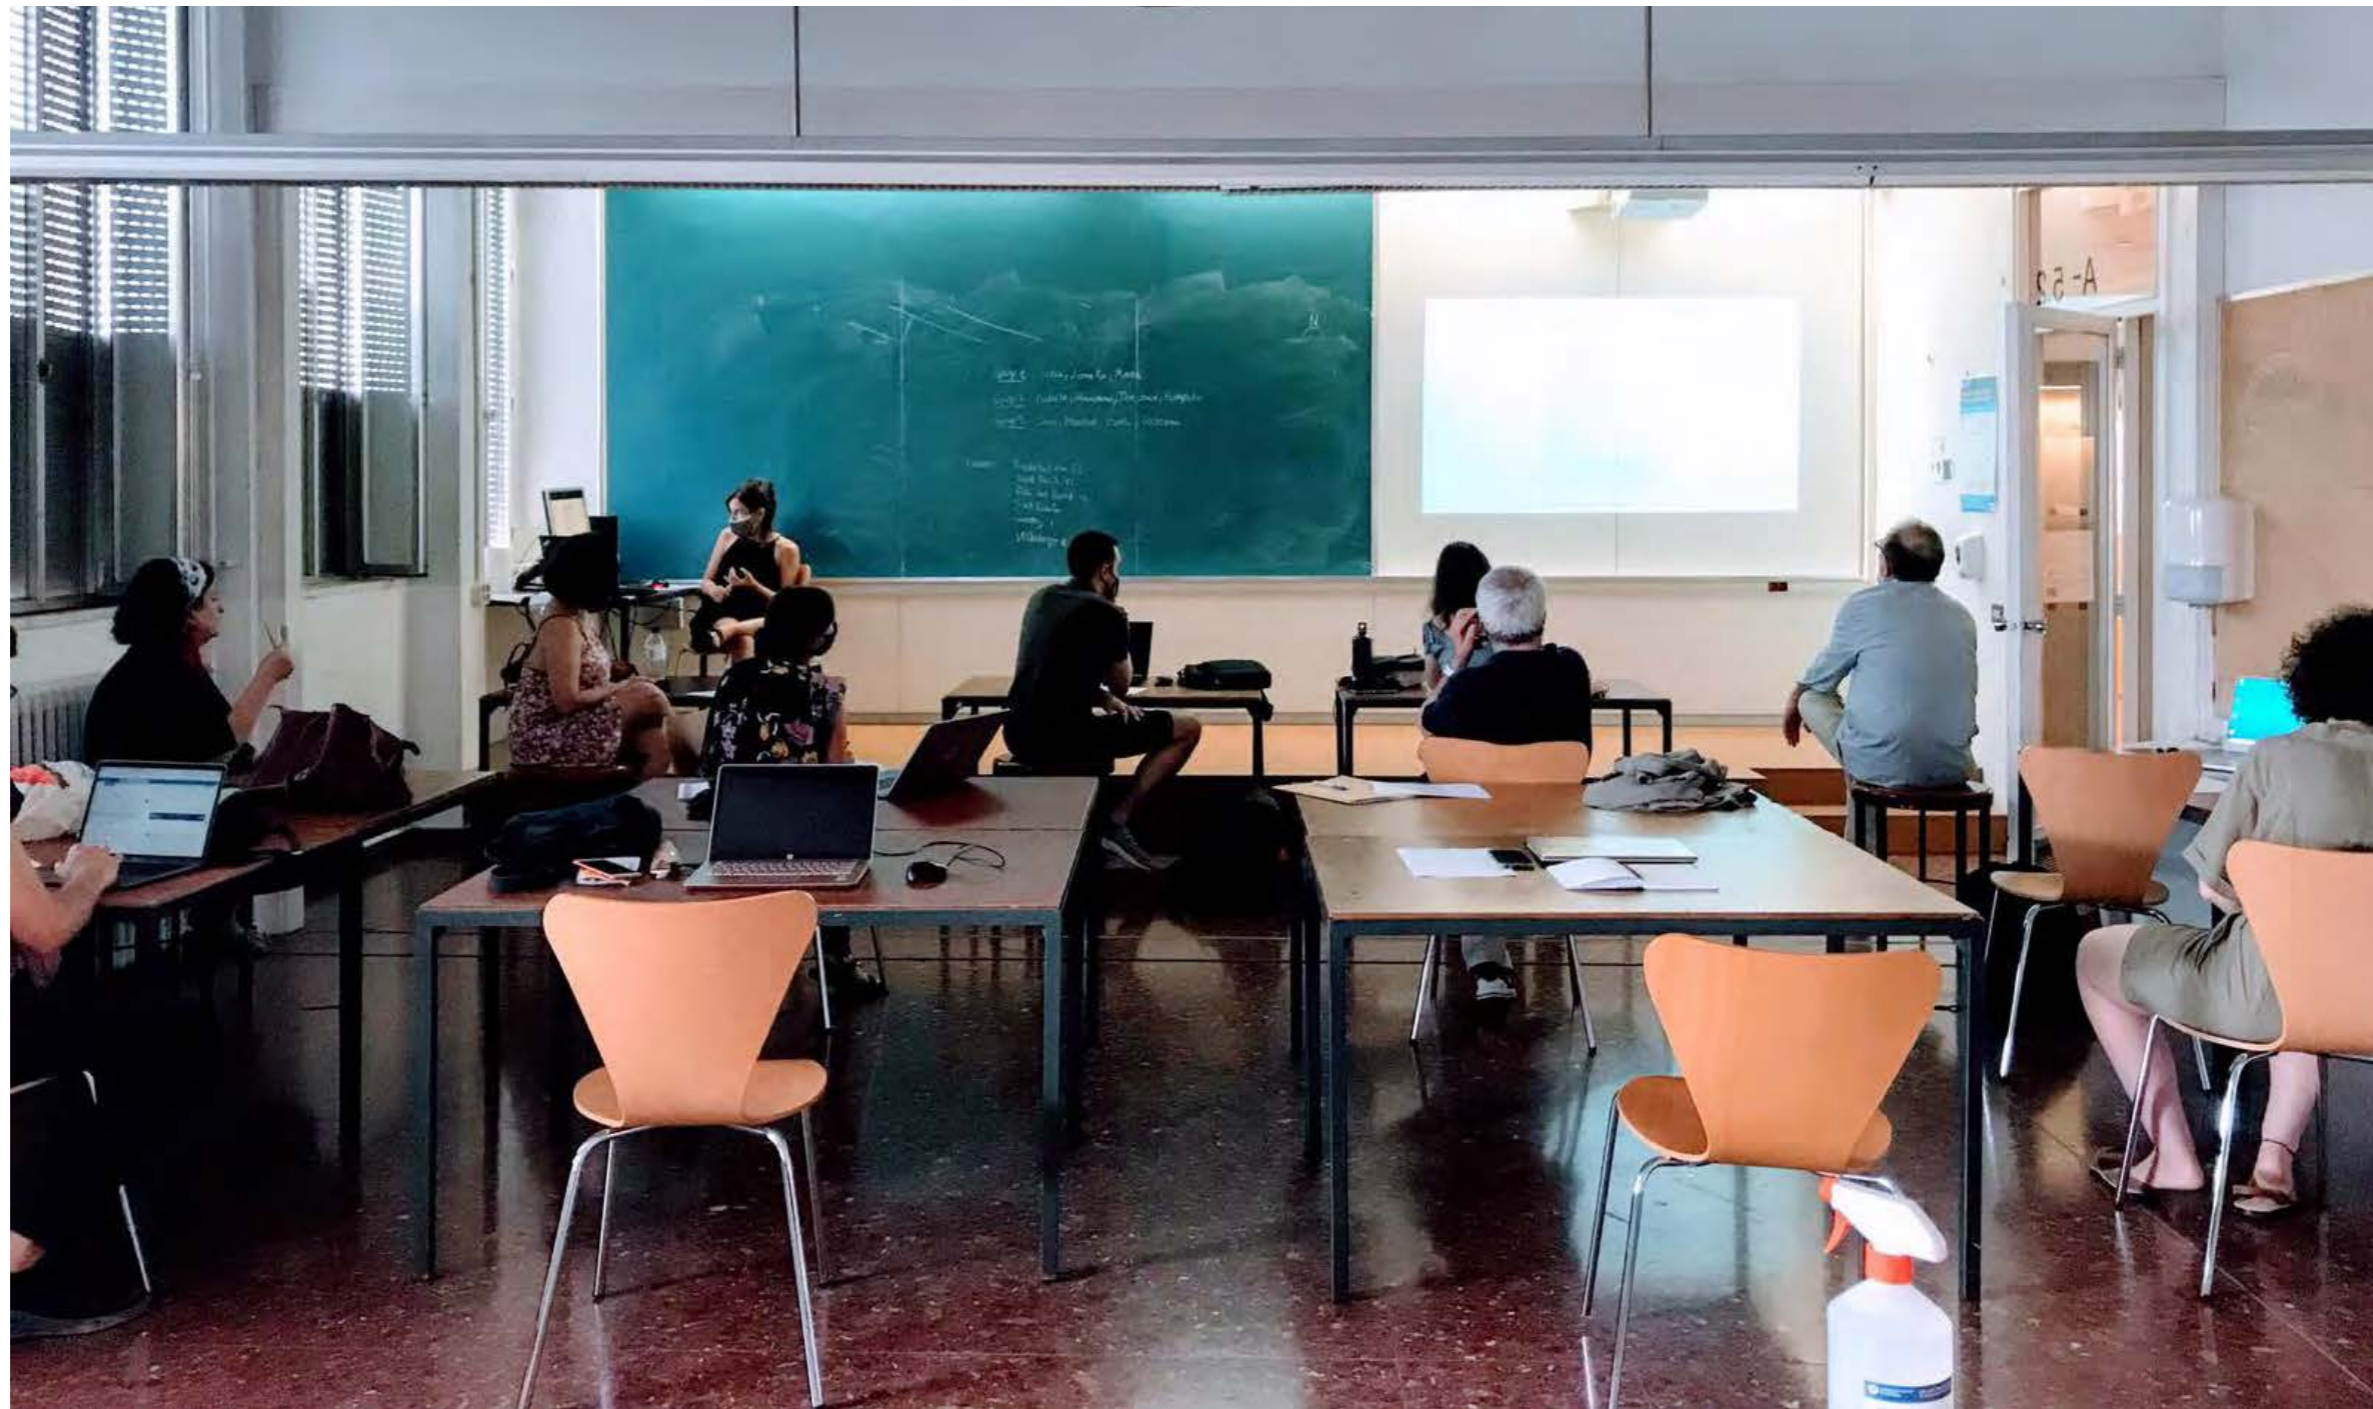

Participatory processes with neighbours

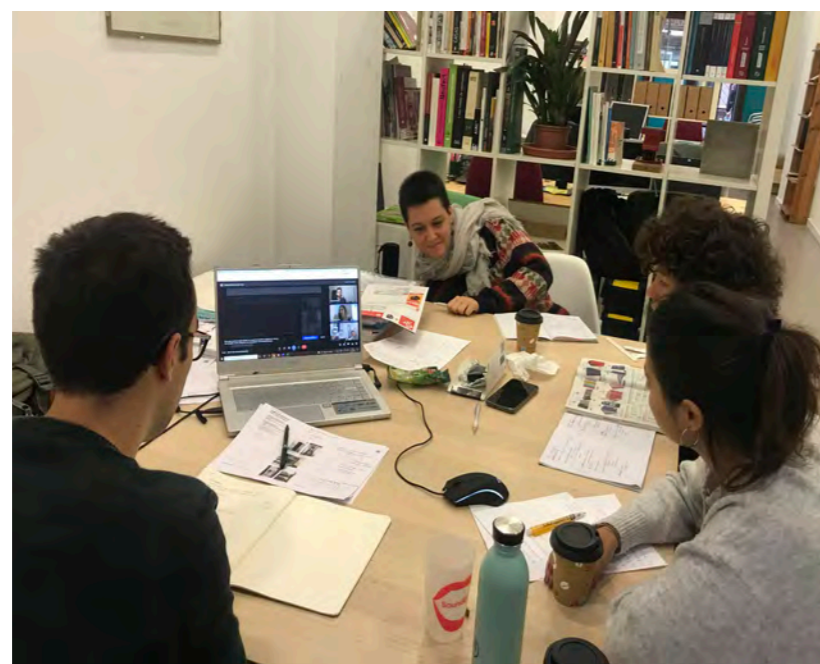

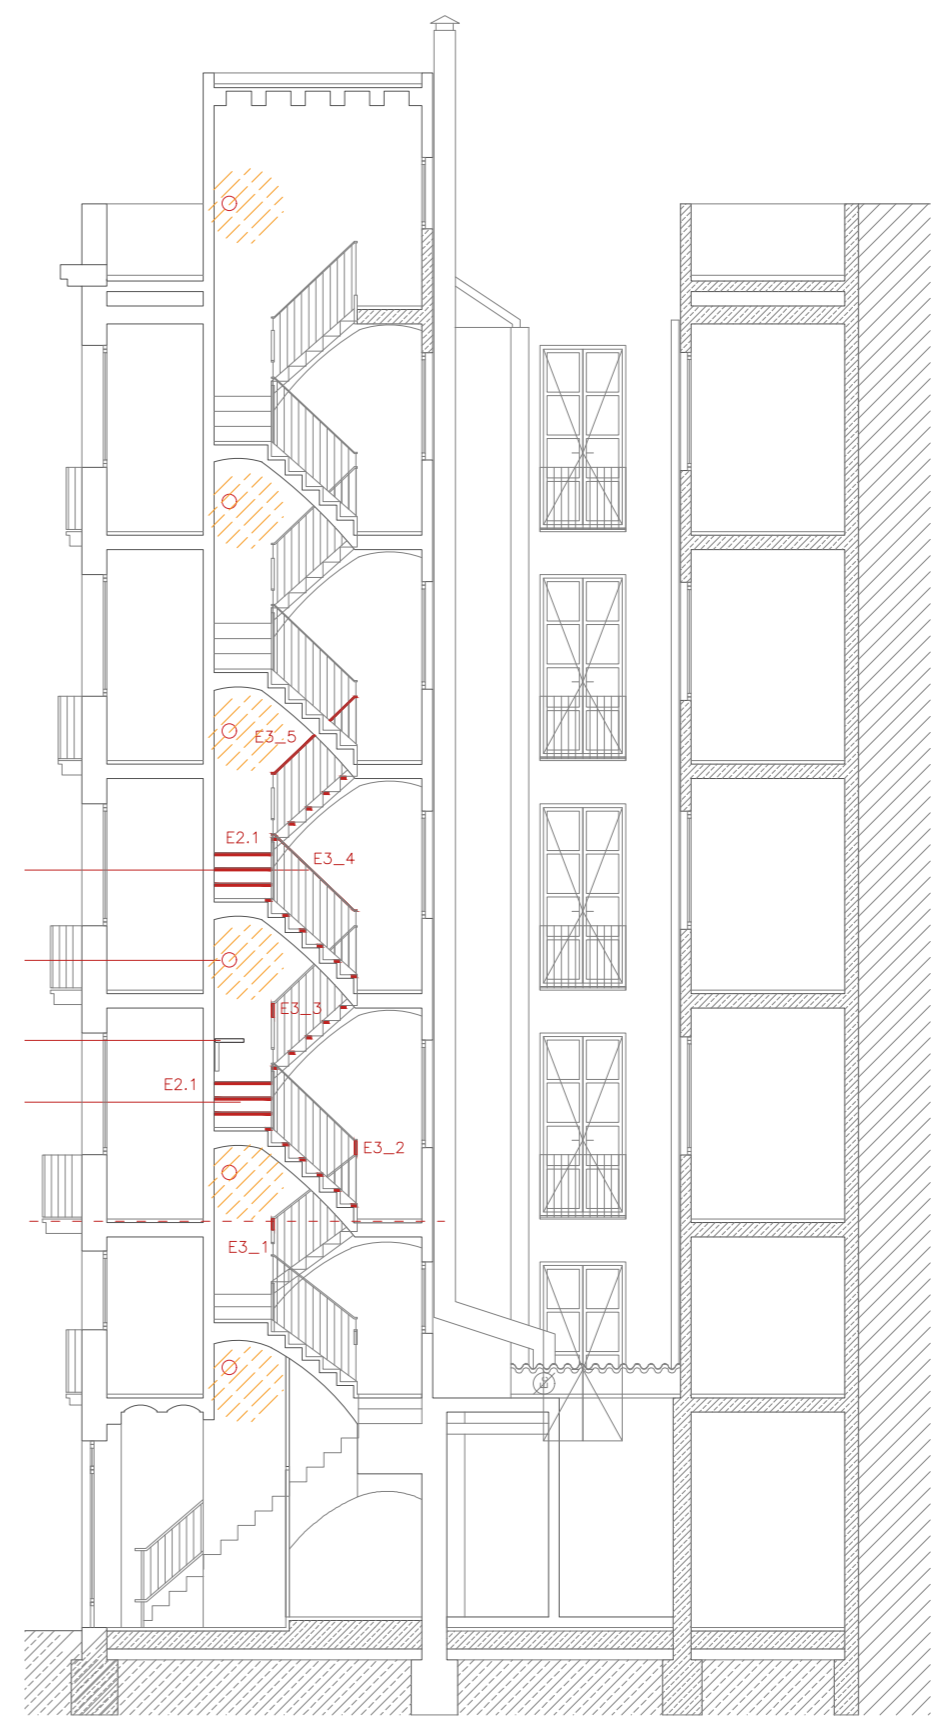

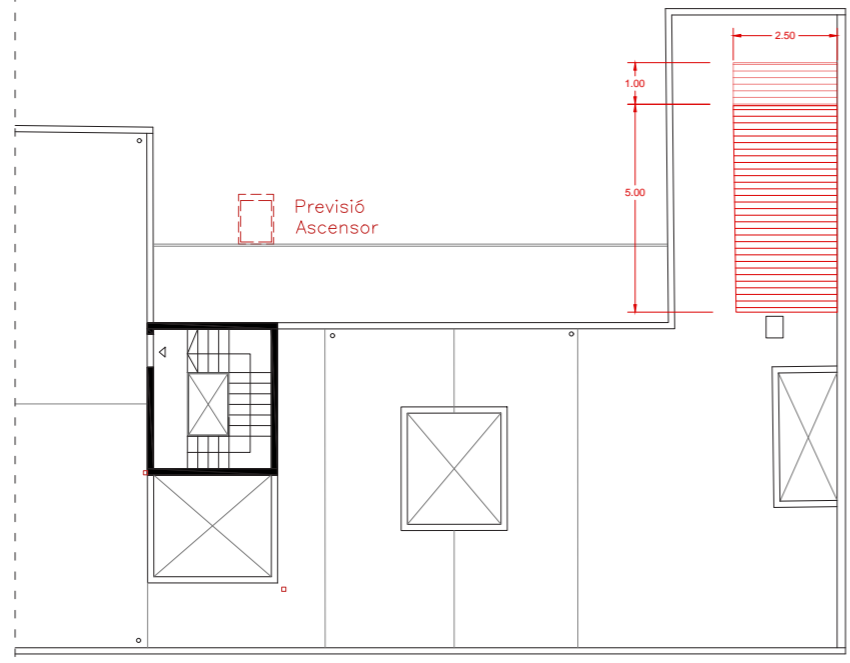

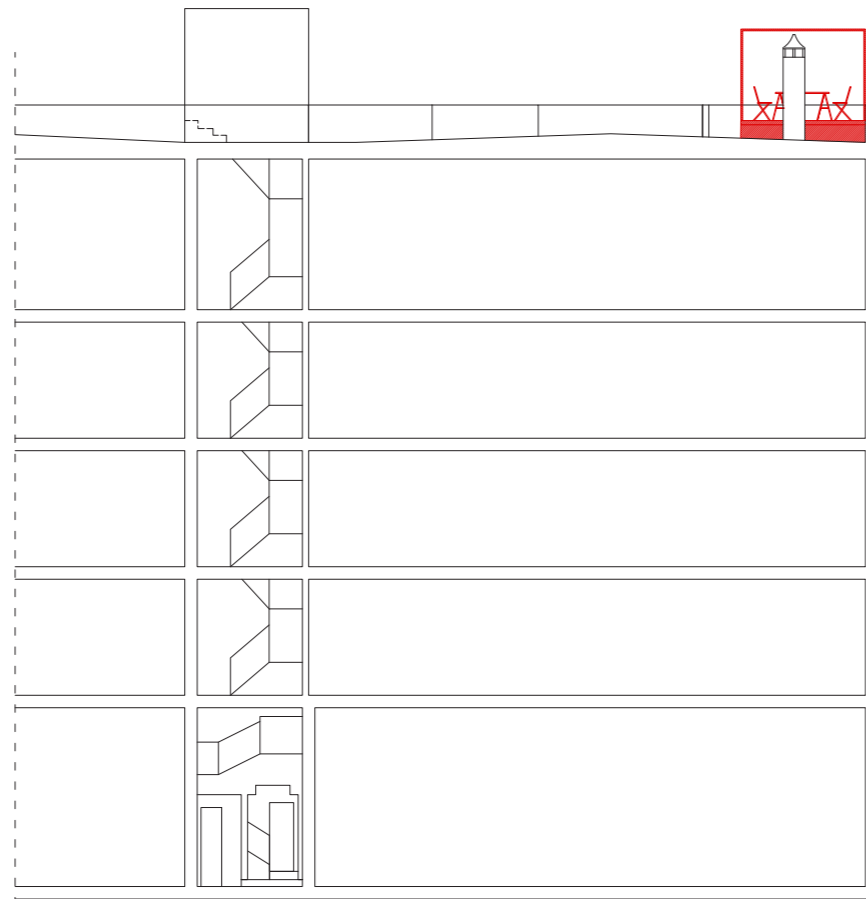

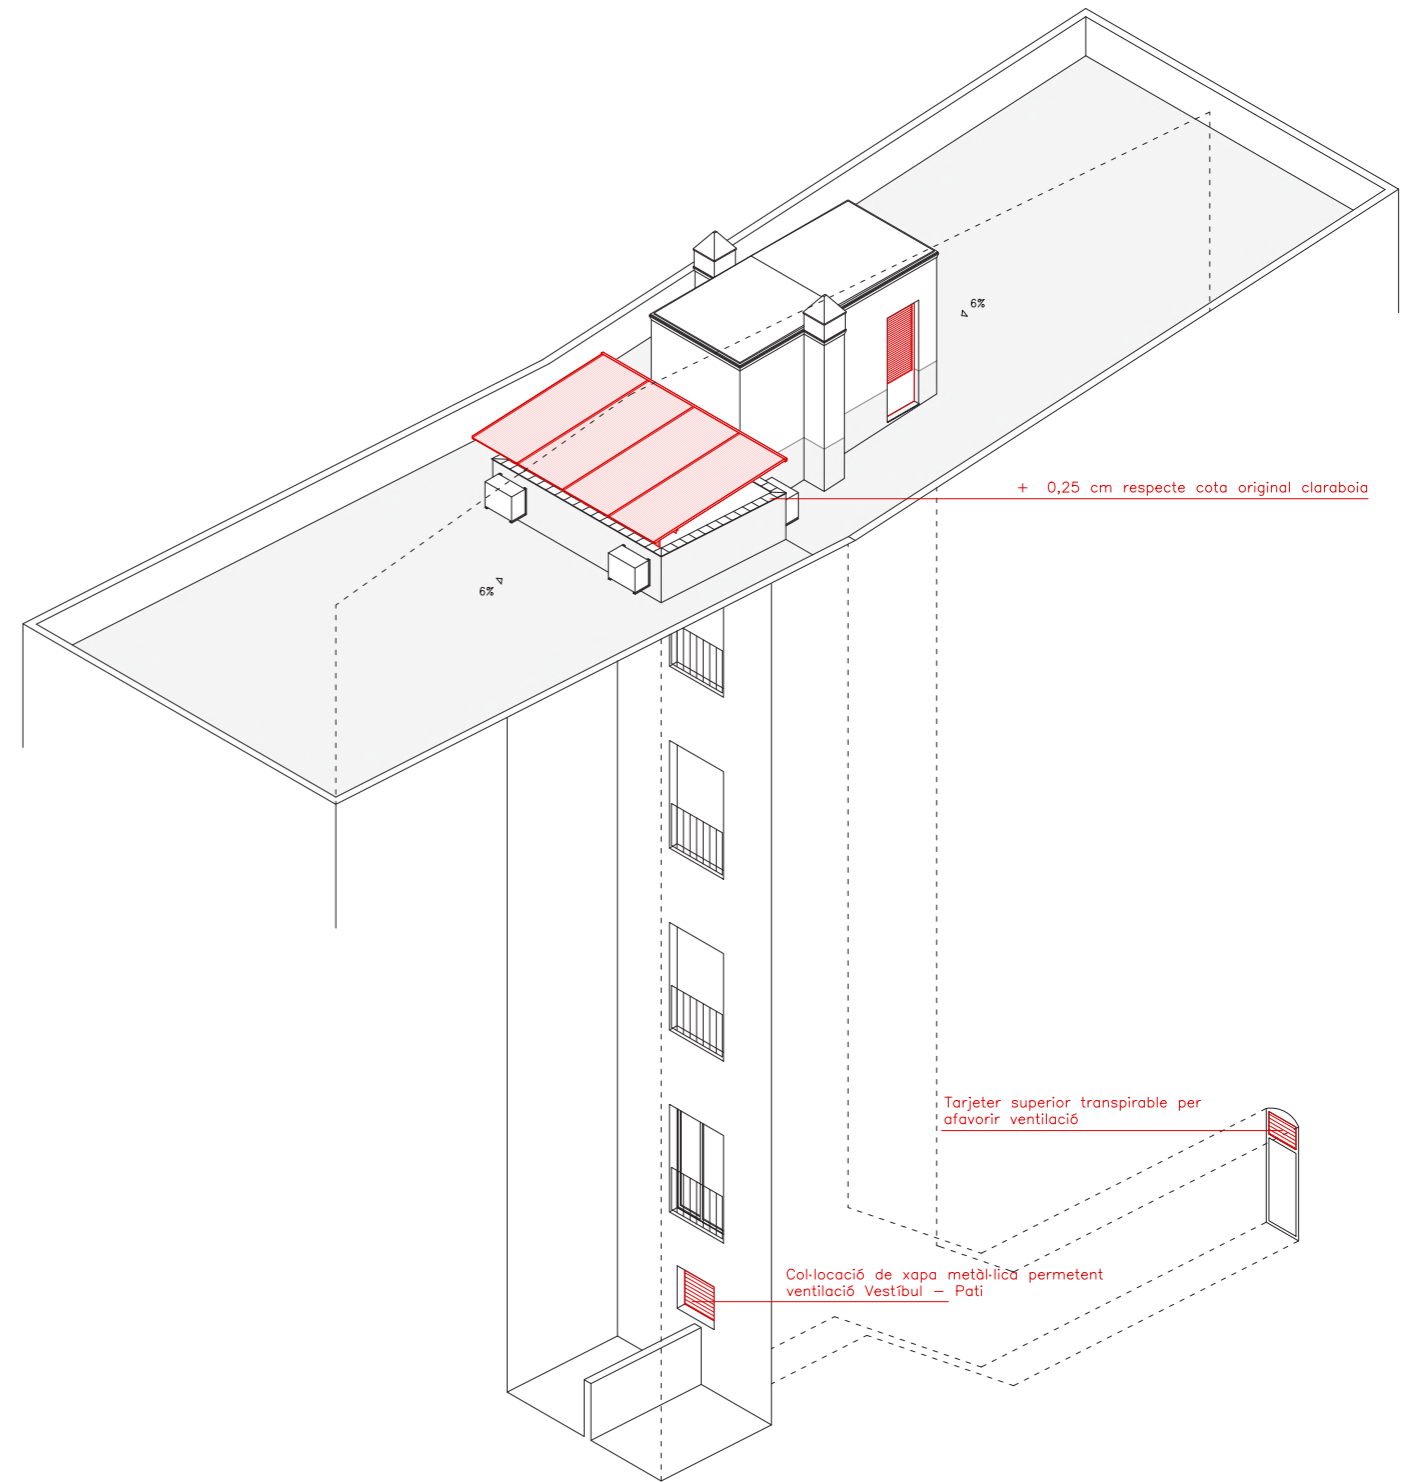

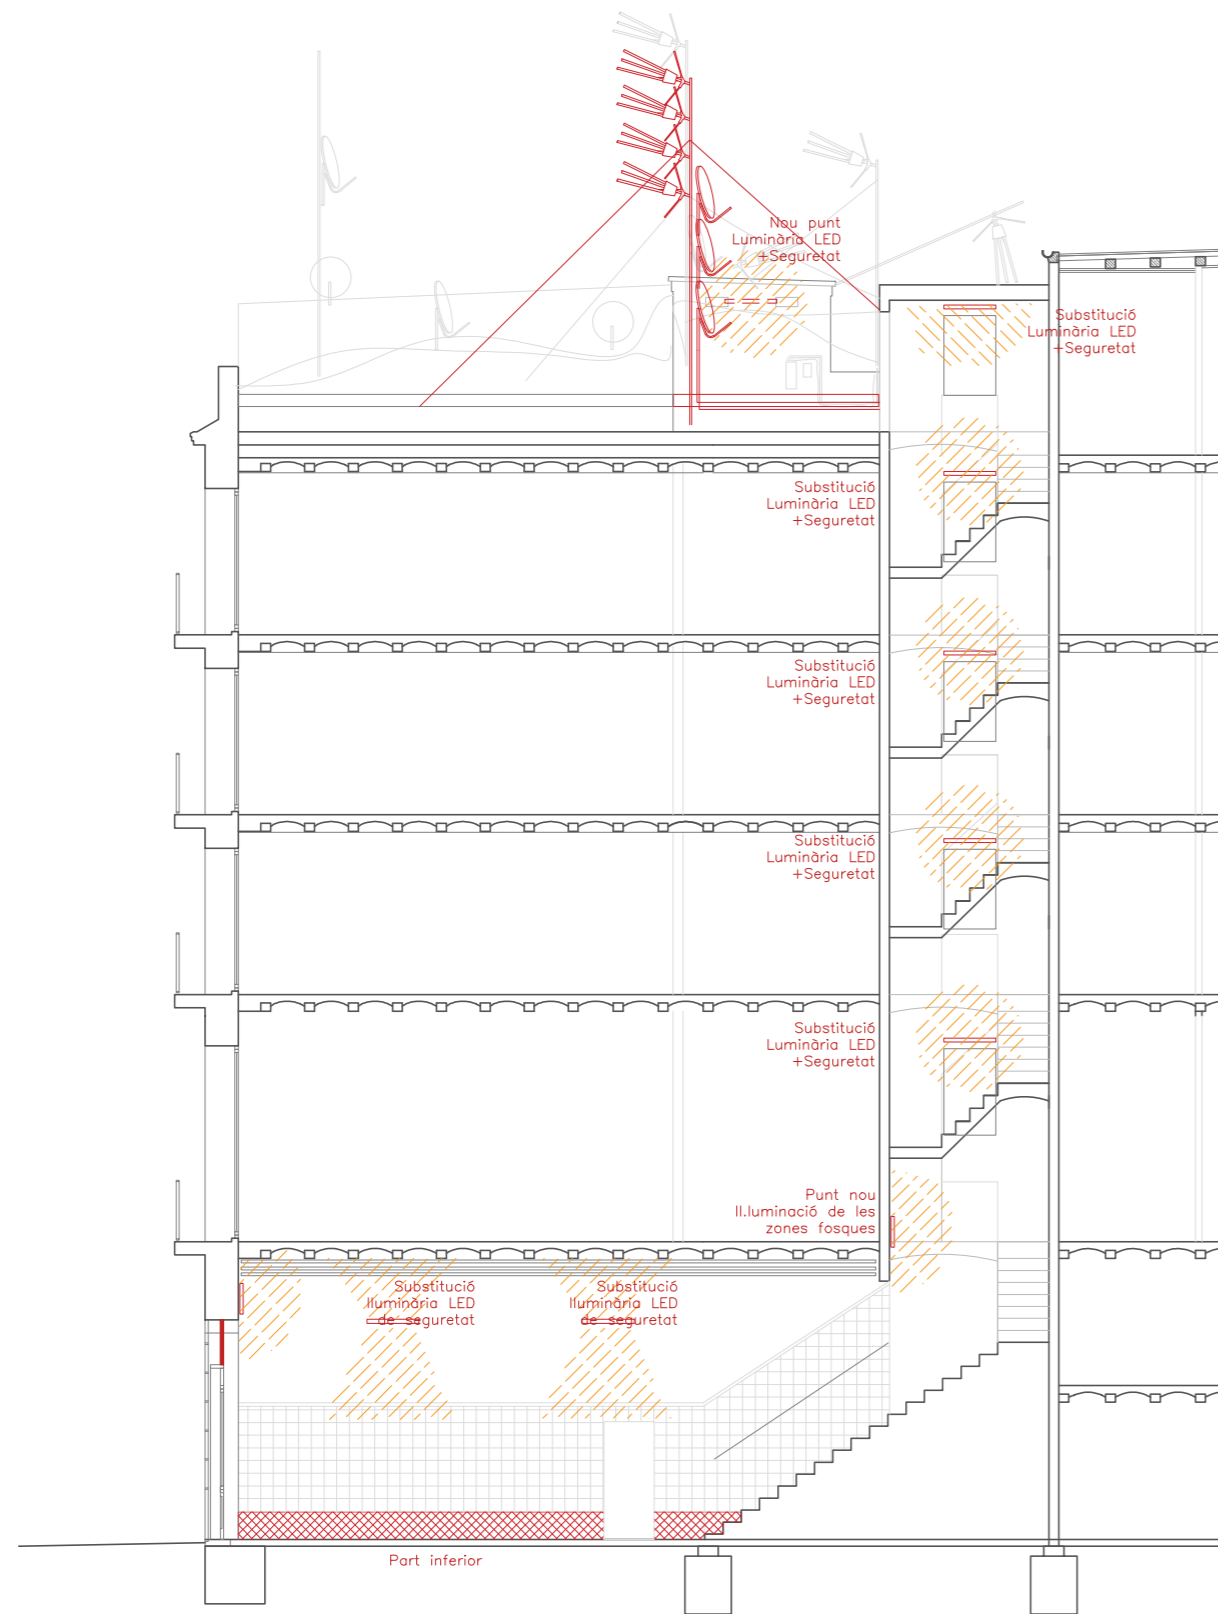

THIRD PHASE. PILOT CO-DESIGN AND DEFFINATION

Academic workshops and participatory processes for the co-design of pilot projects

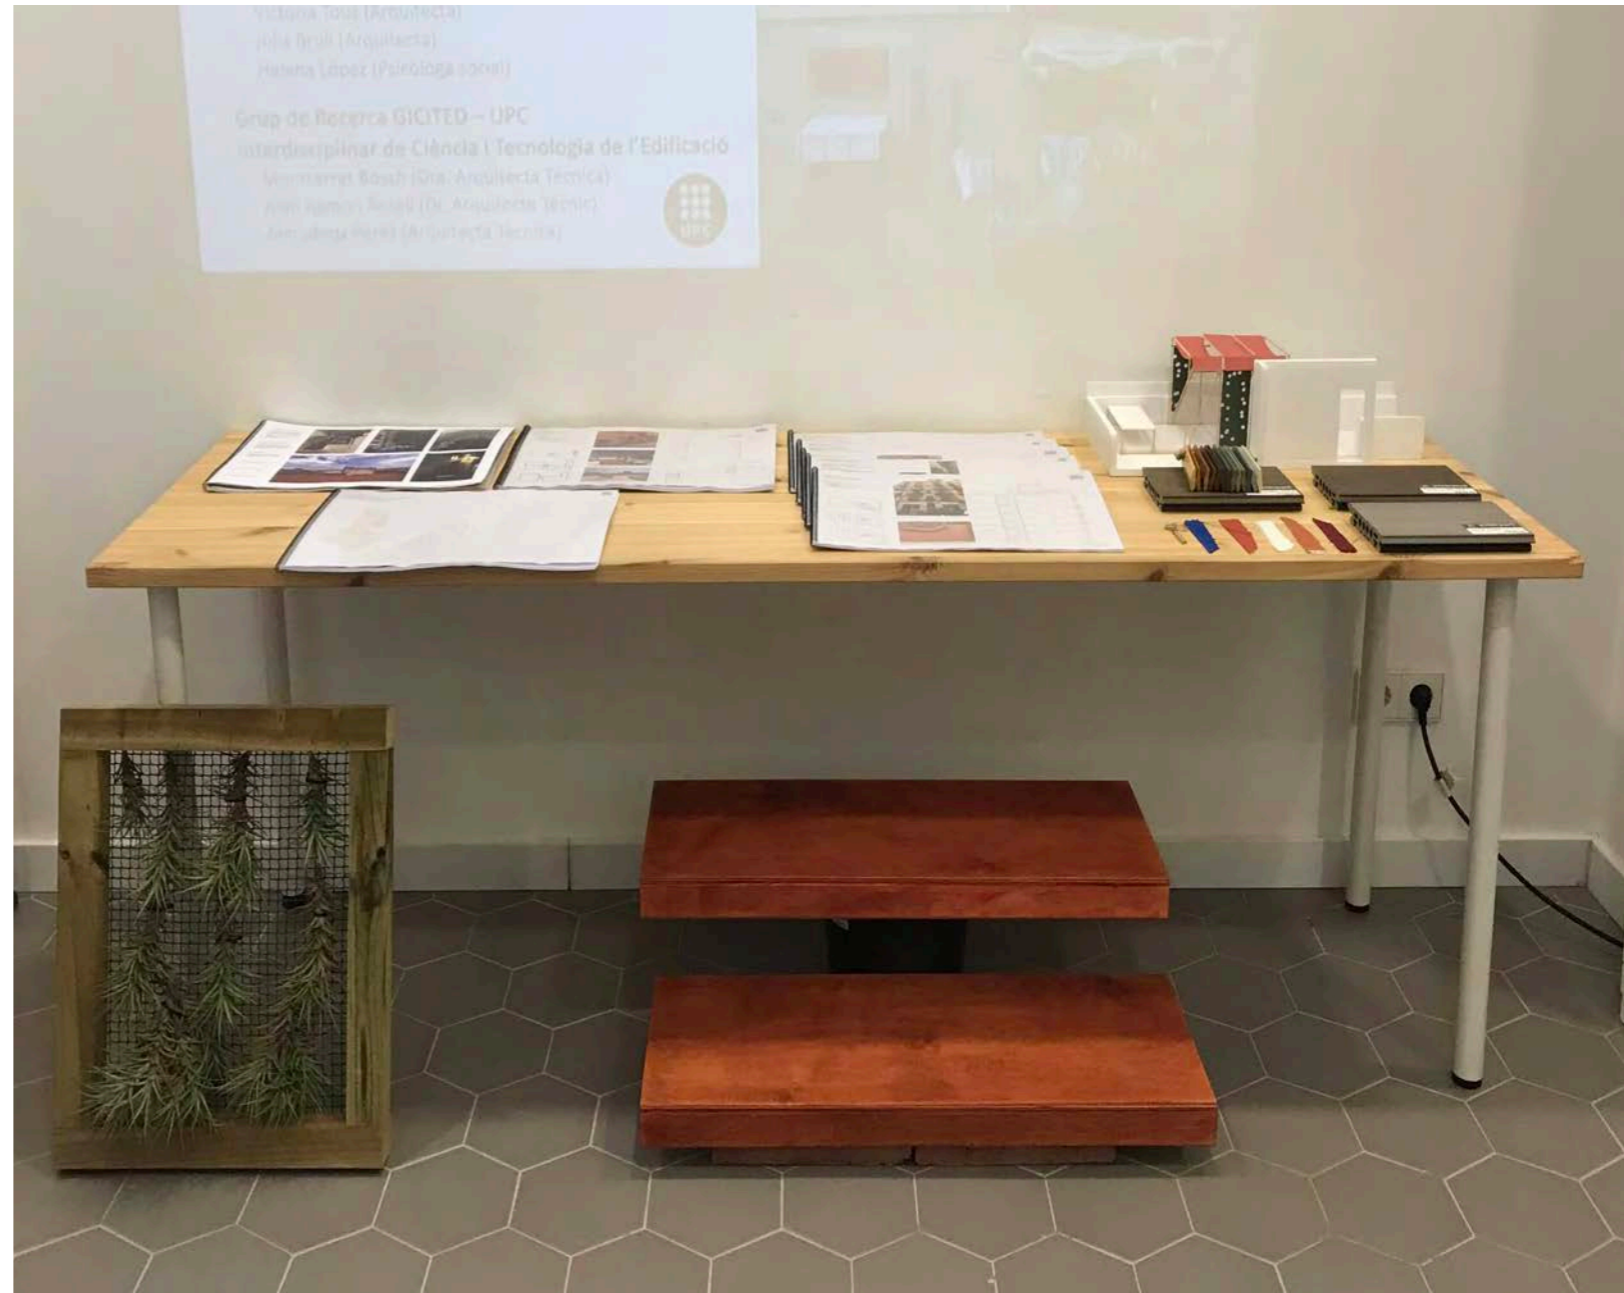

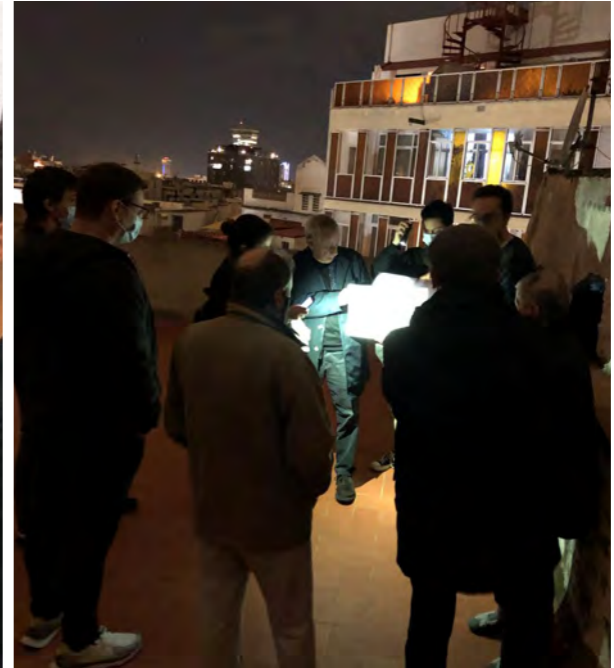

Participatory processes for the selection and adaptation of pilot projects to five communities

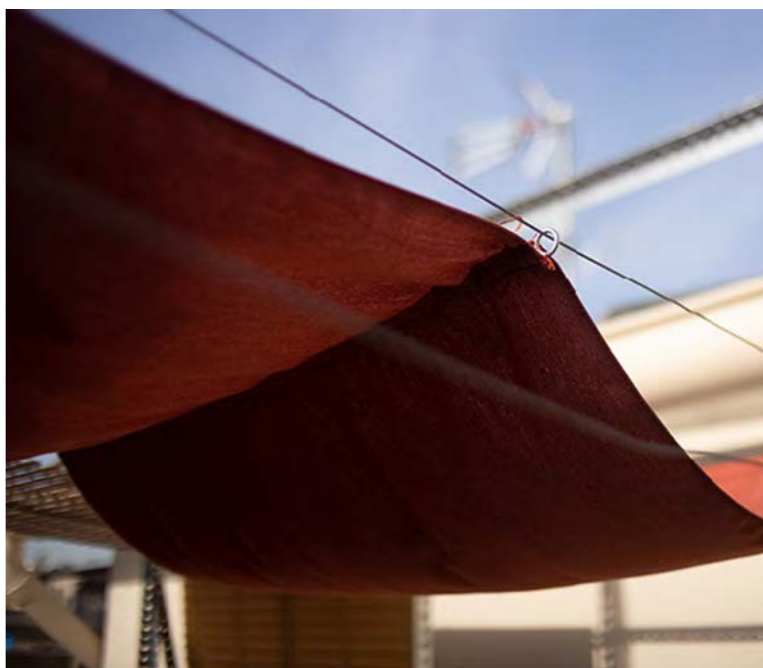

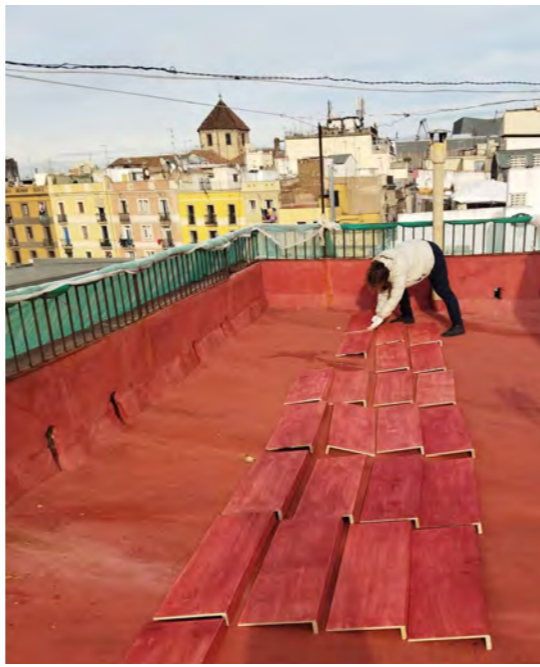

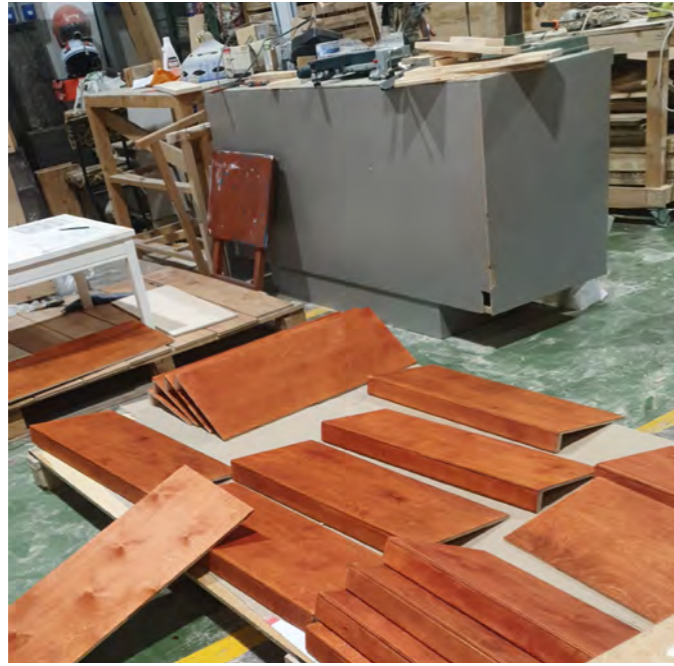

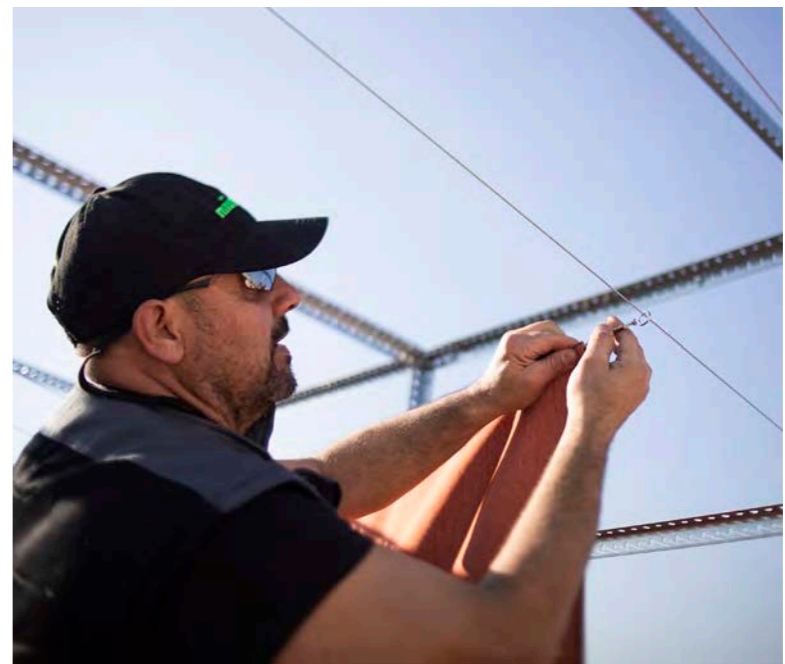

FOURTH PHASE. CO-FABRICATION

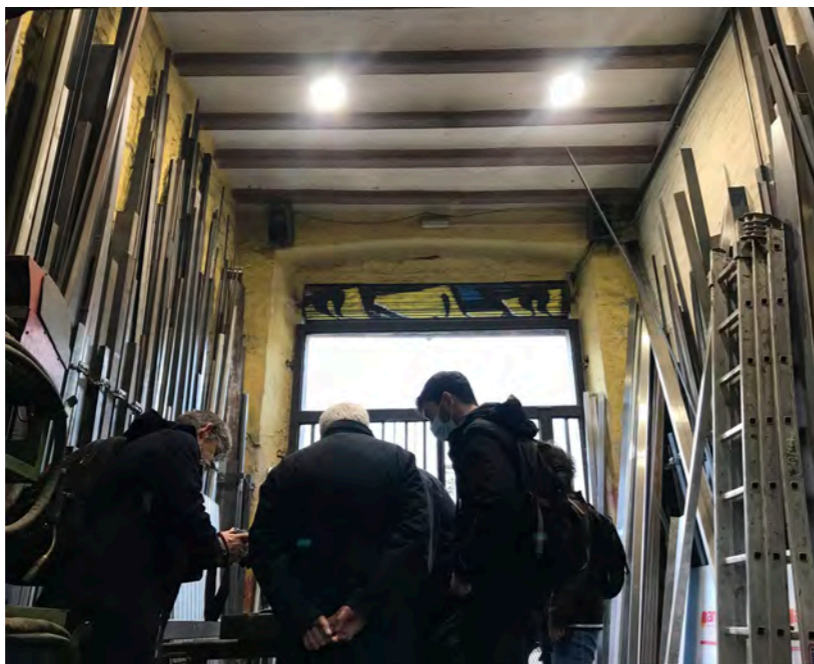

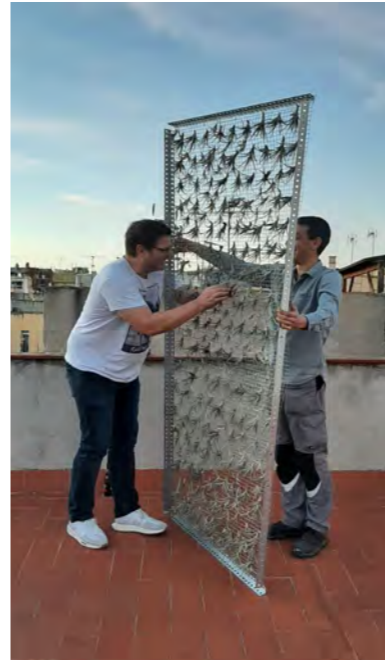

On-site implementation and co-fabrication of pilot projects by residents and local professionals

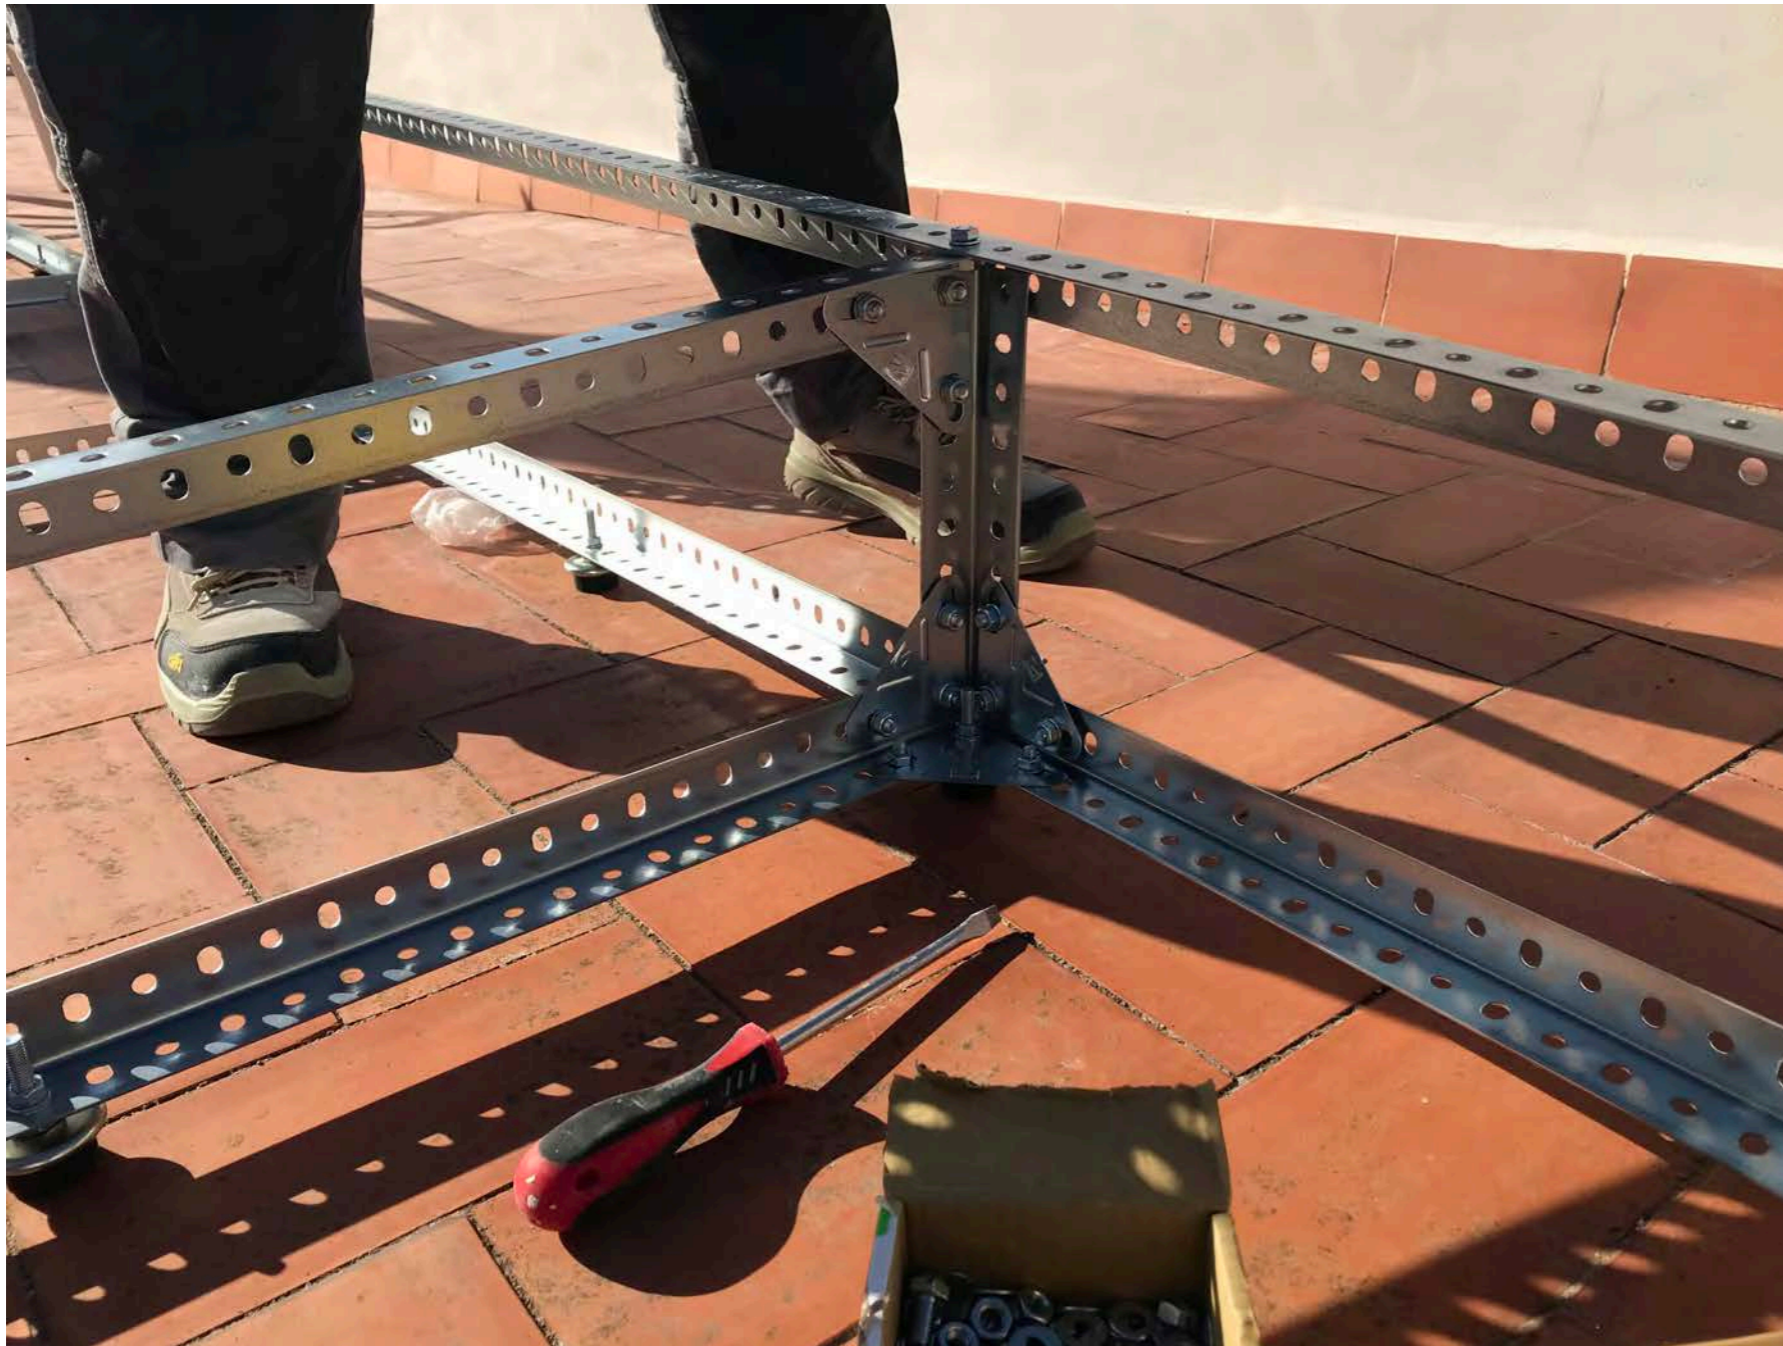

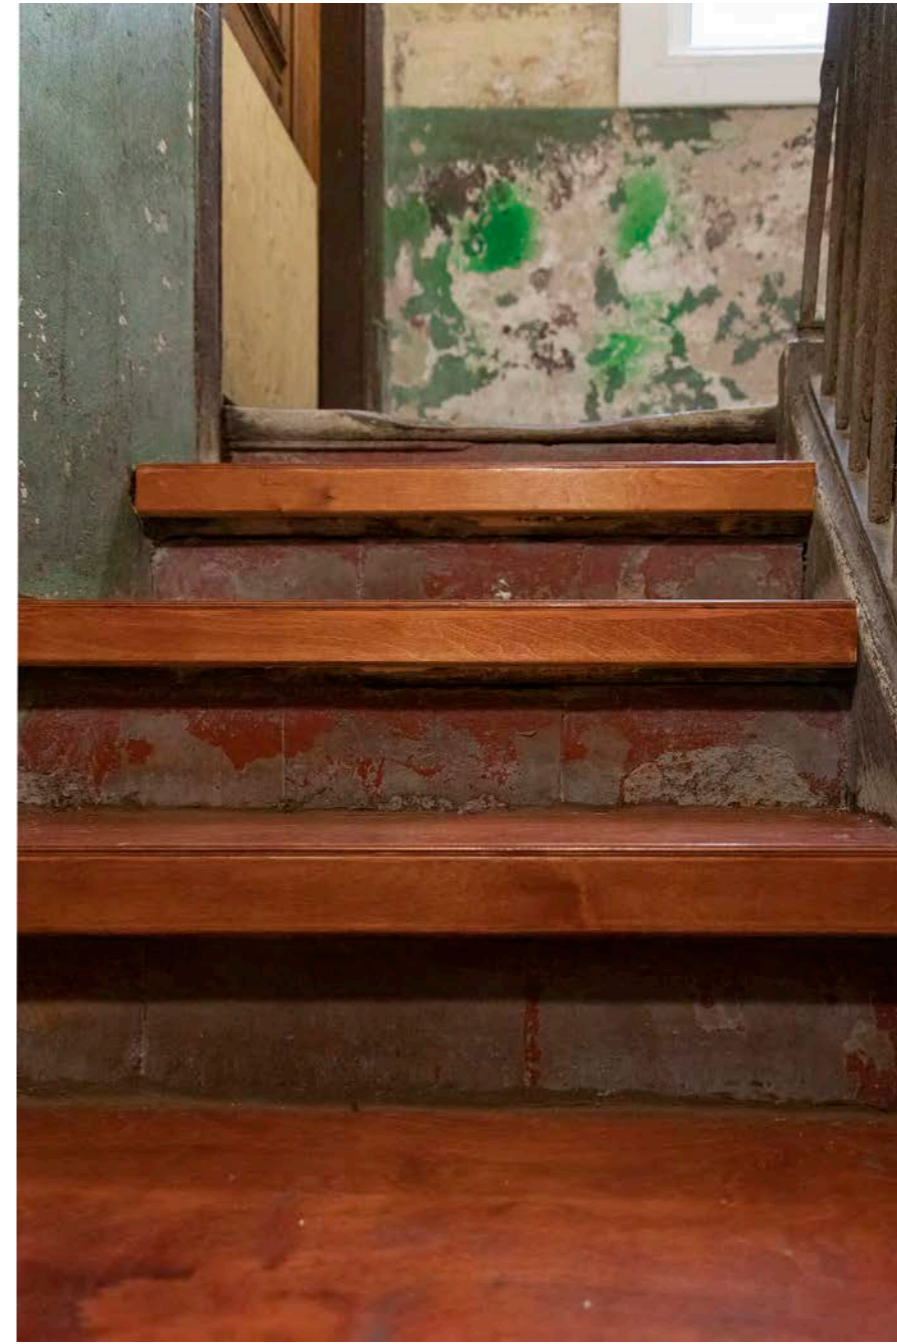

FIFTH PHASE. BUILT PROJECTS

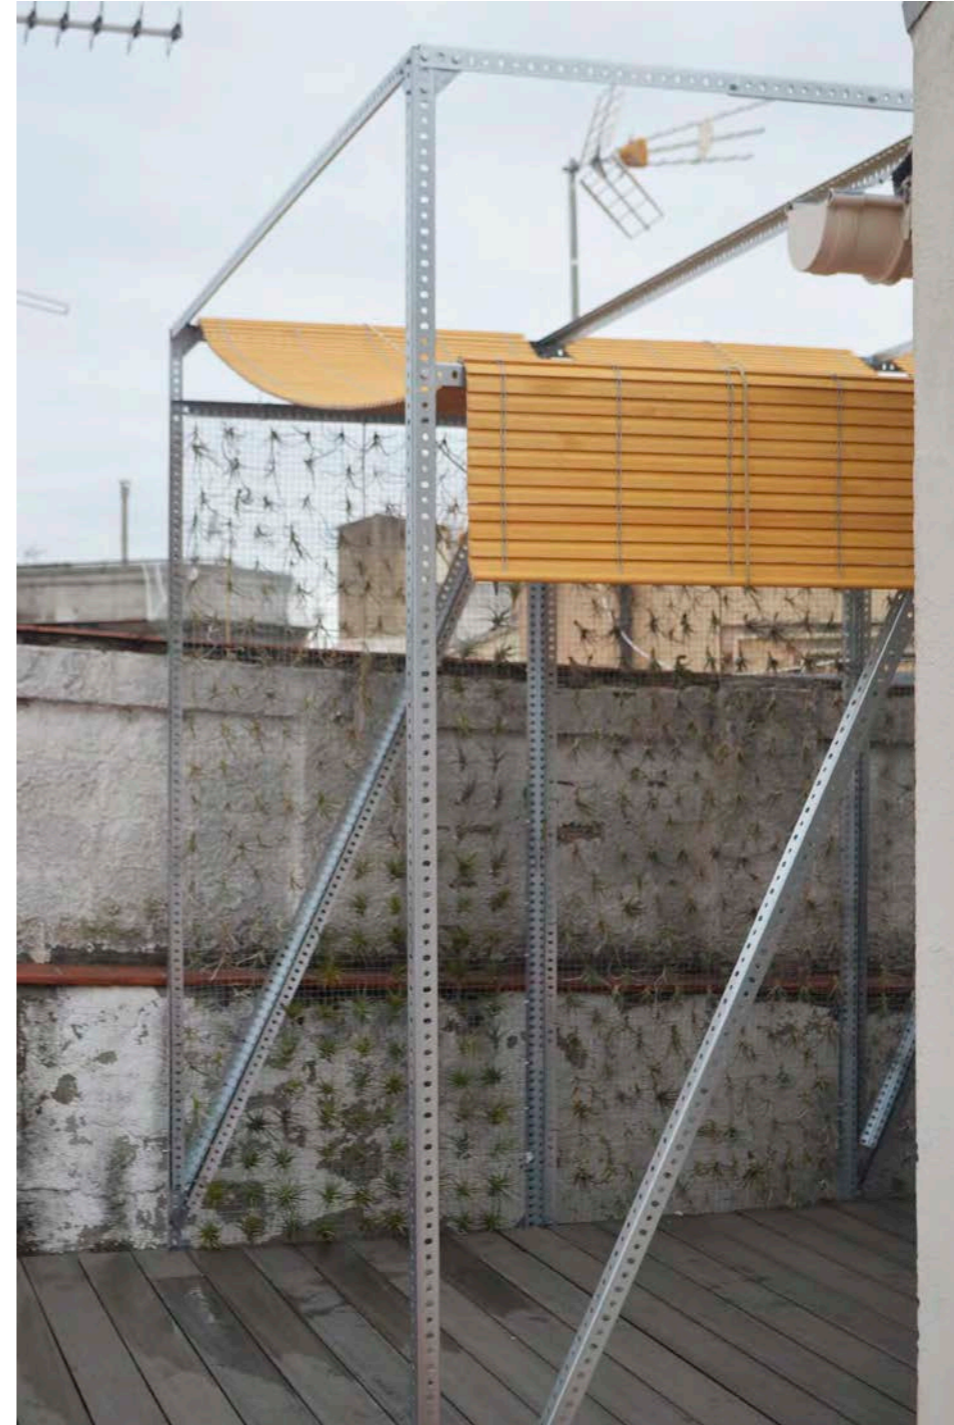

Industrialized components of adjustable size based on dry construction systems that can be adapted to fit different physical supports

Low-cost perfectible solutions that attach the existing built support without compromising heritage protection

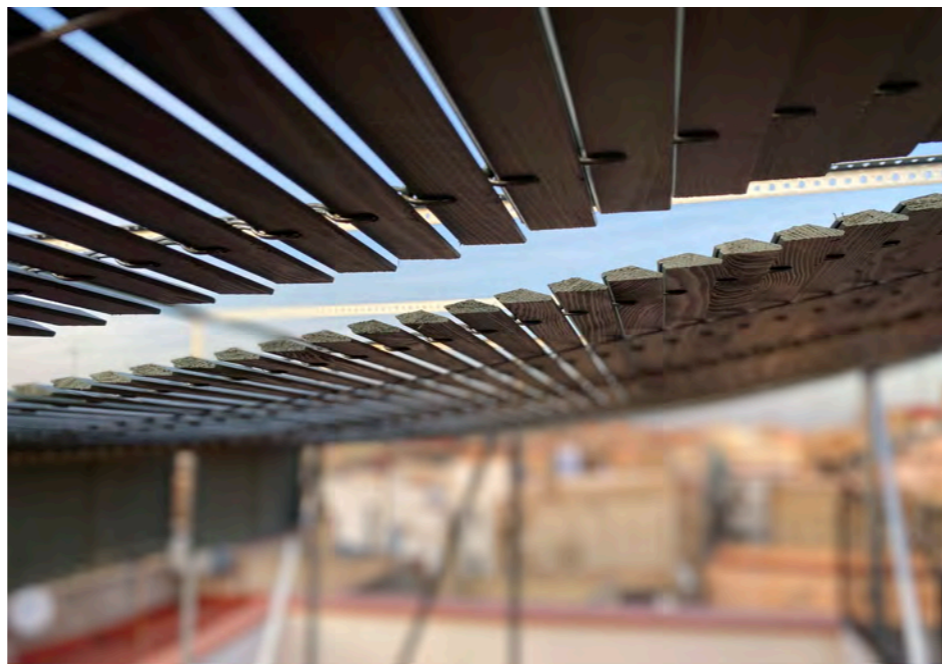

Open structures and designs that incorporate plug-in components and provide an universal base that can admit variable finishings

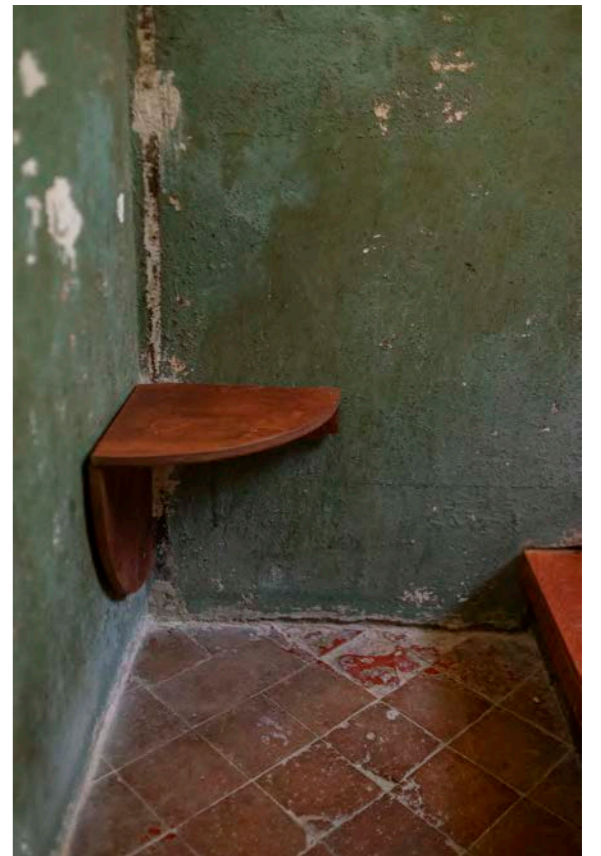

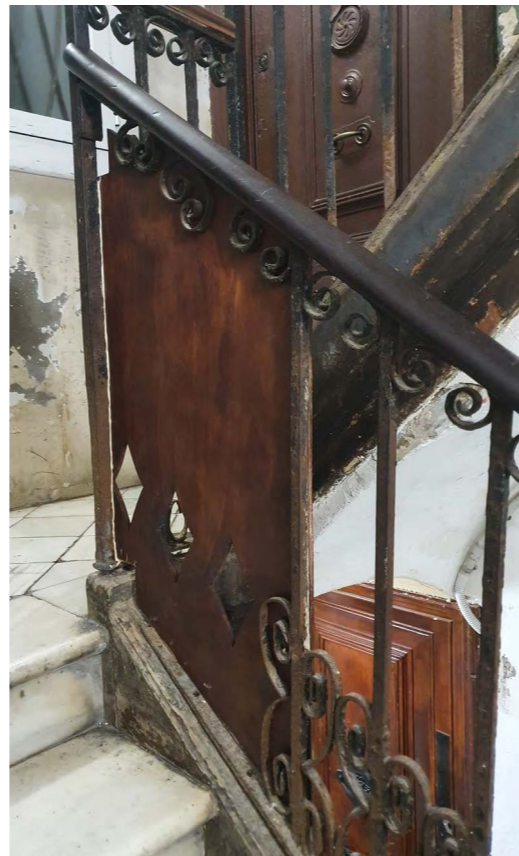

Attachable plug-in components (plants, shades, storage,...) and variability of colours, textures and materials

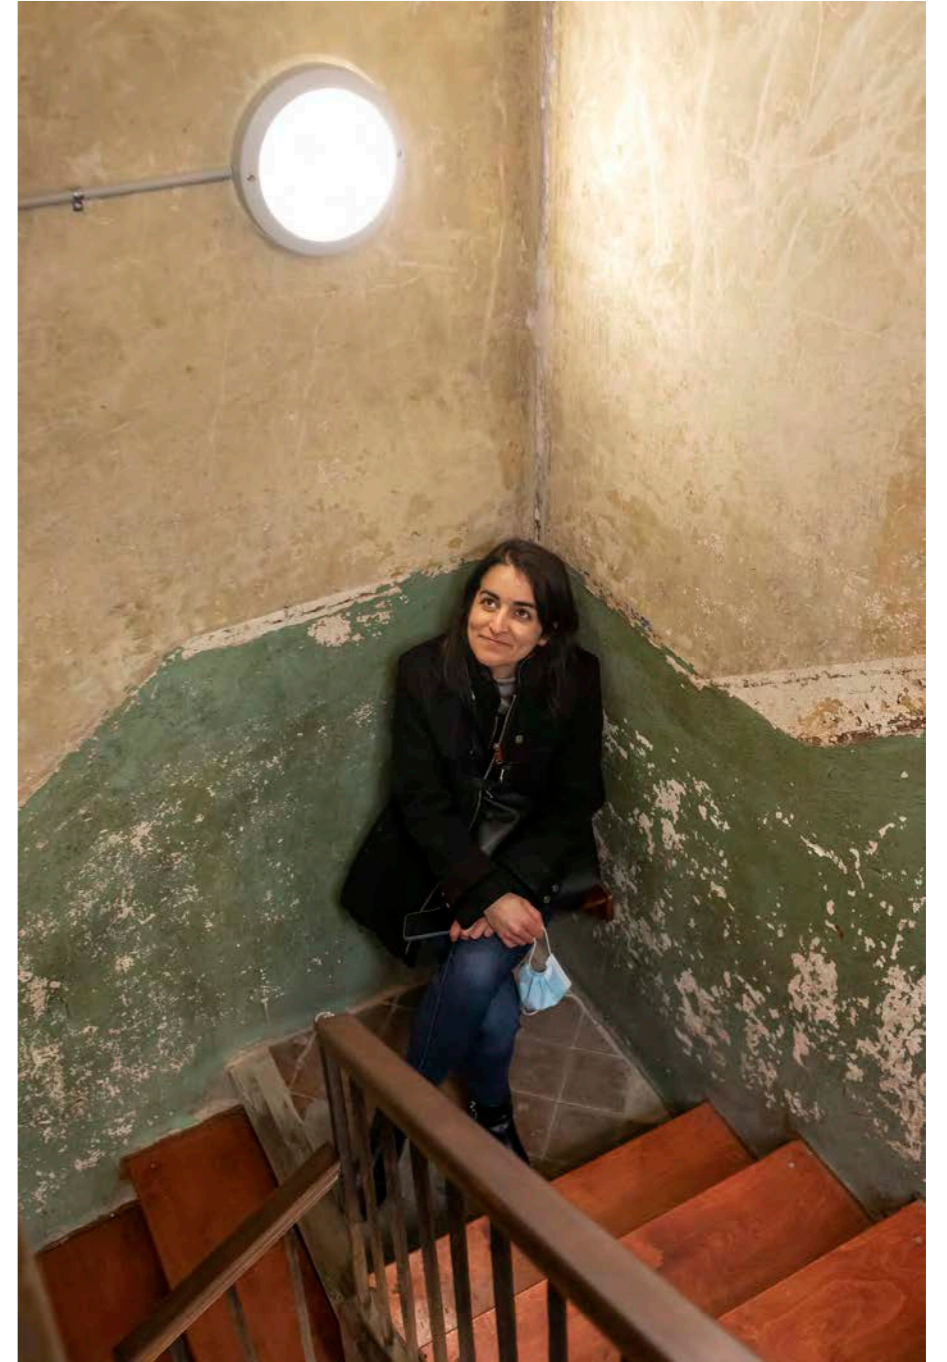

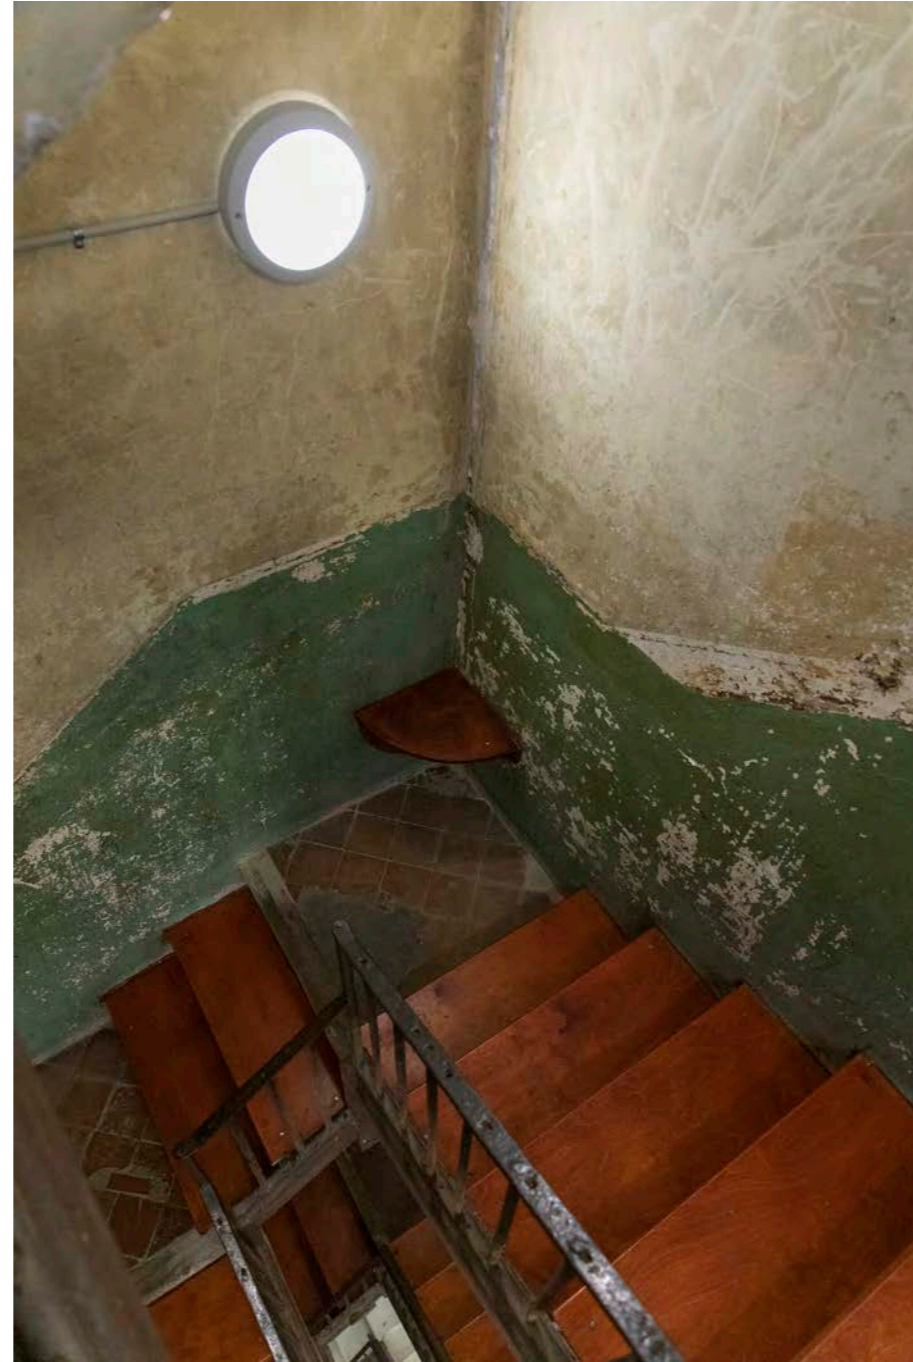

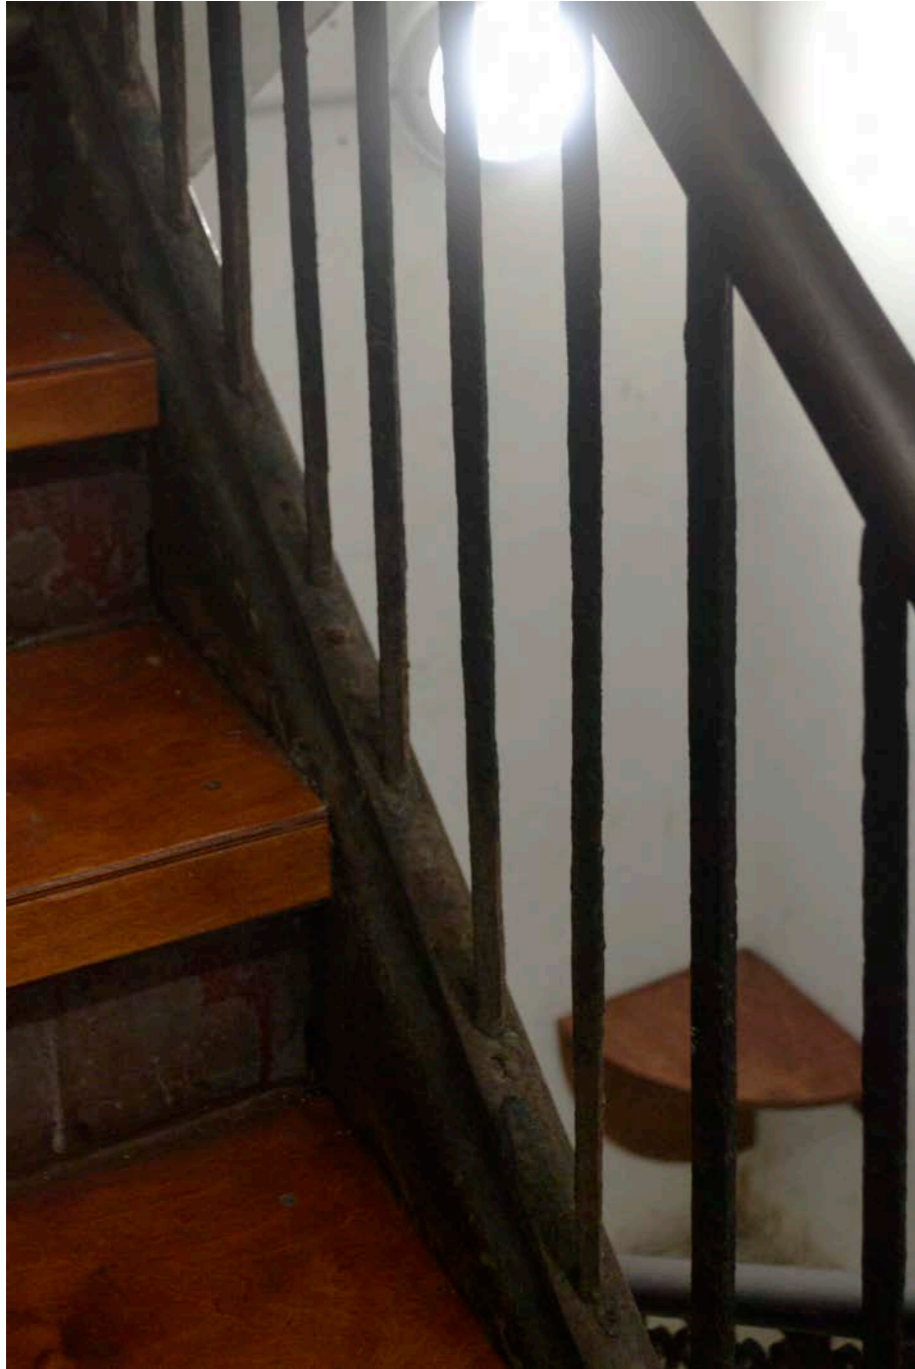

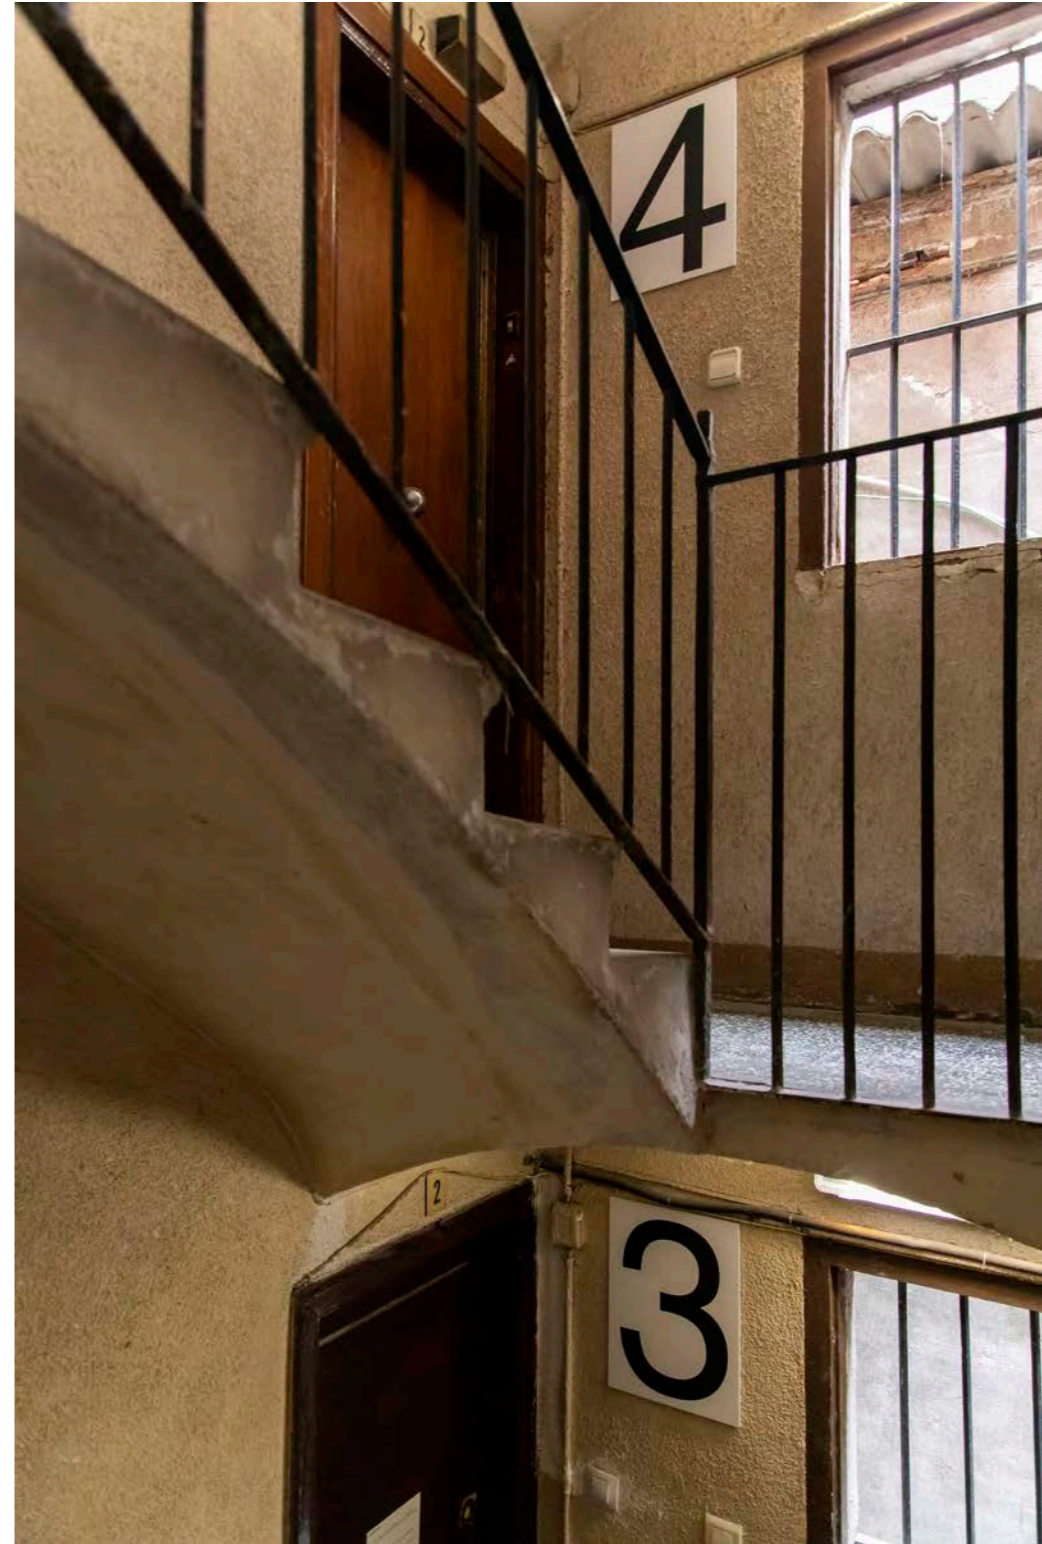

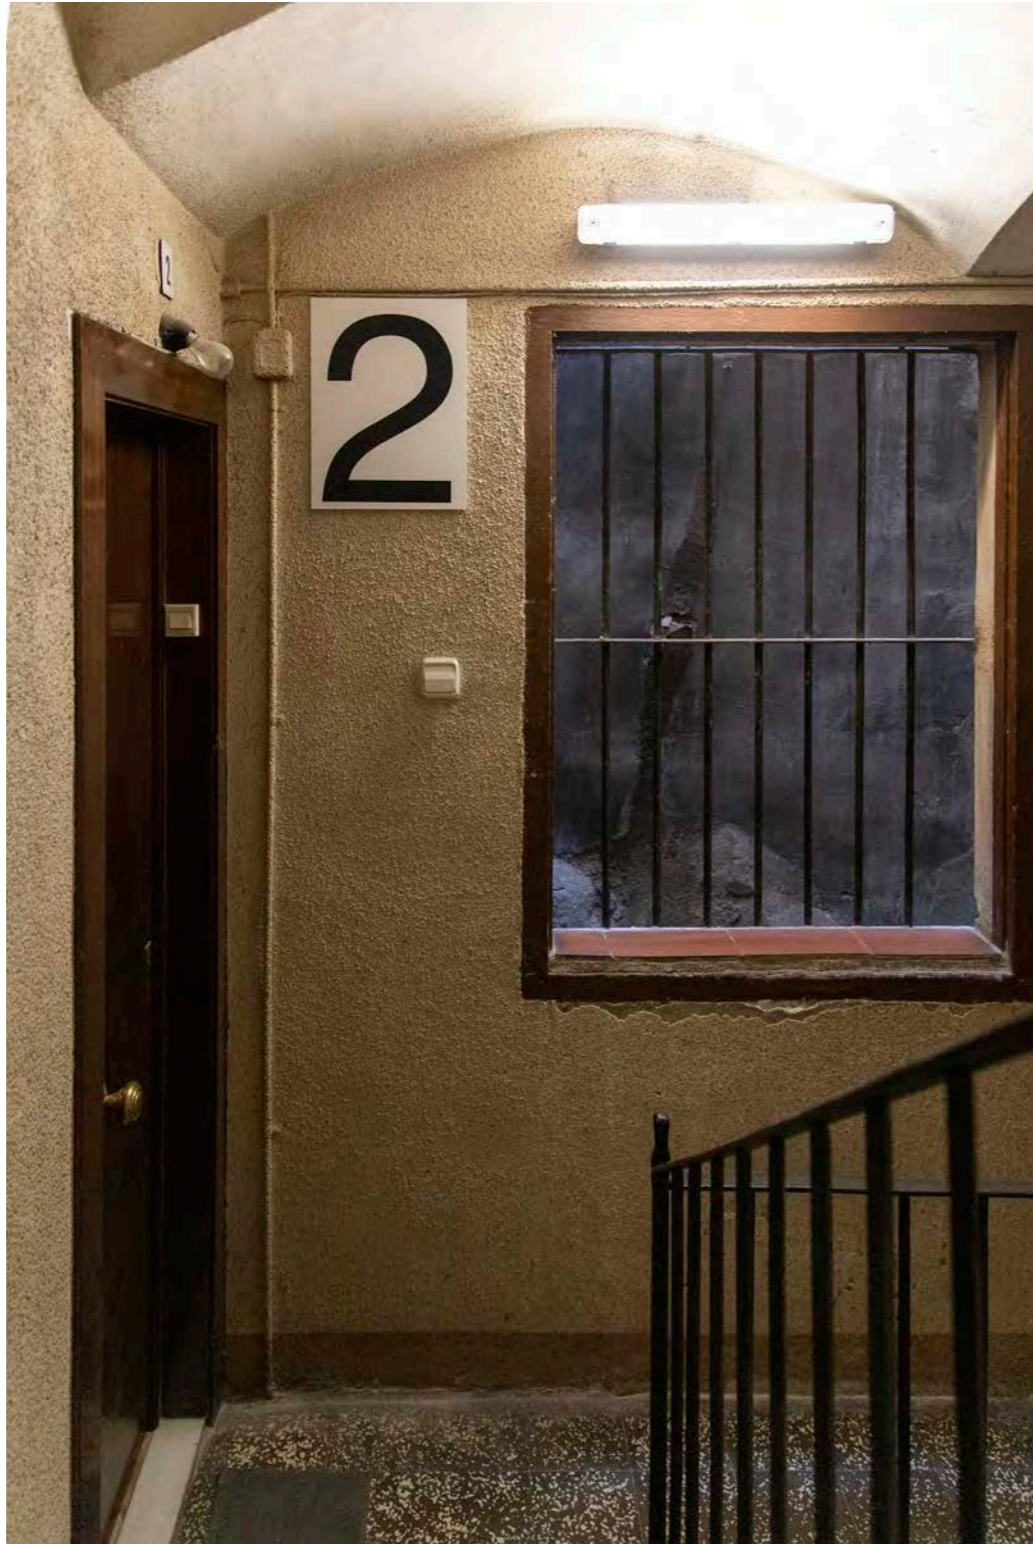

FINAL PHASE. COHABITATION

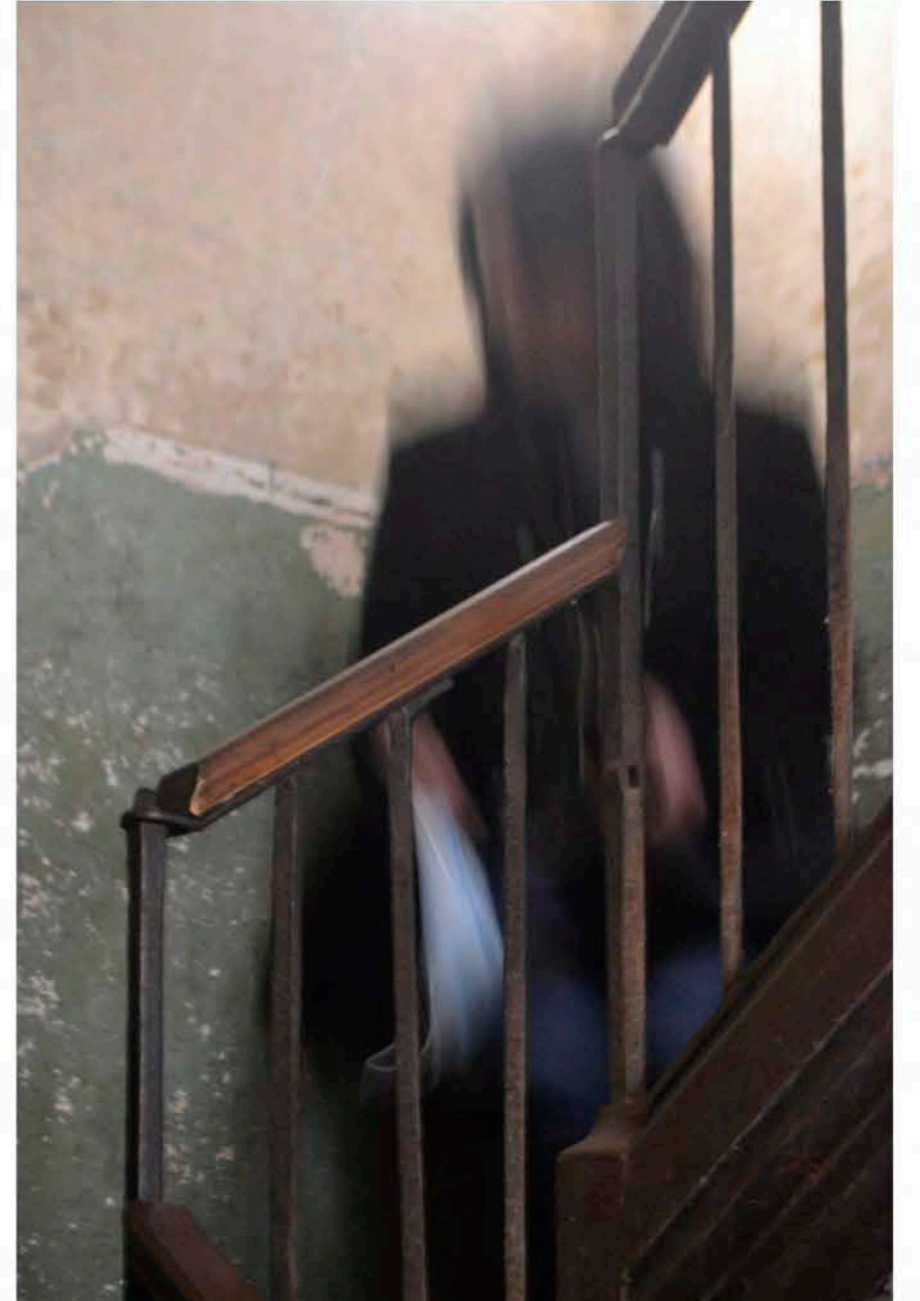

Habitability, inclusion, accessibility, safety, sustainability, care and health in Sant Ramon and Sant Pacià interventions on the staircase.

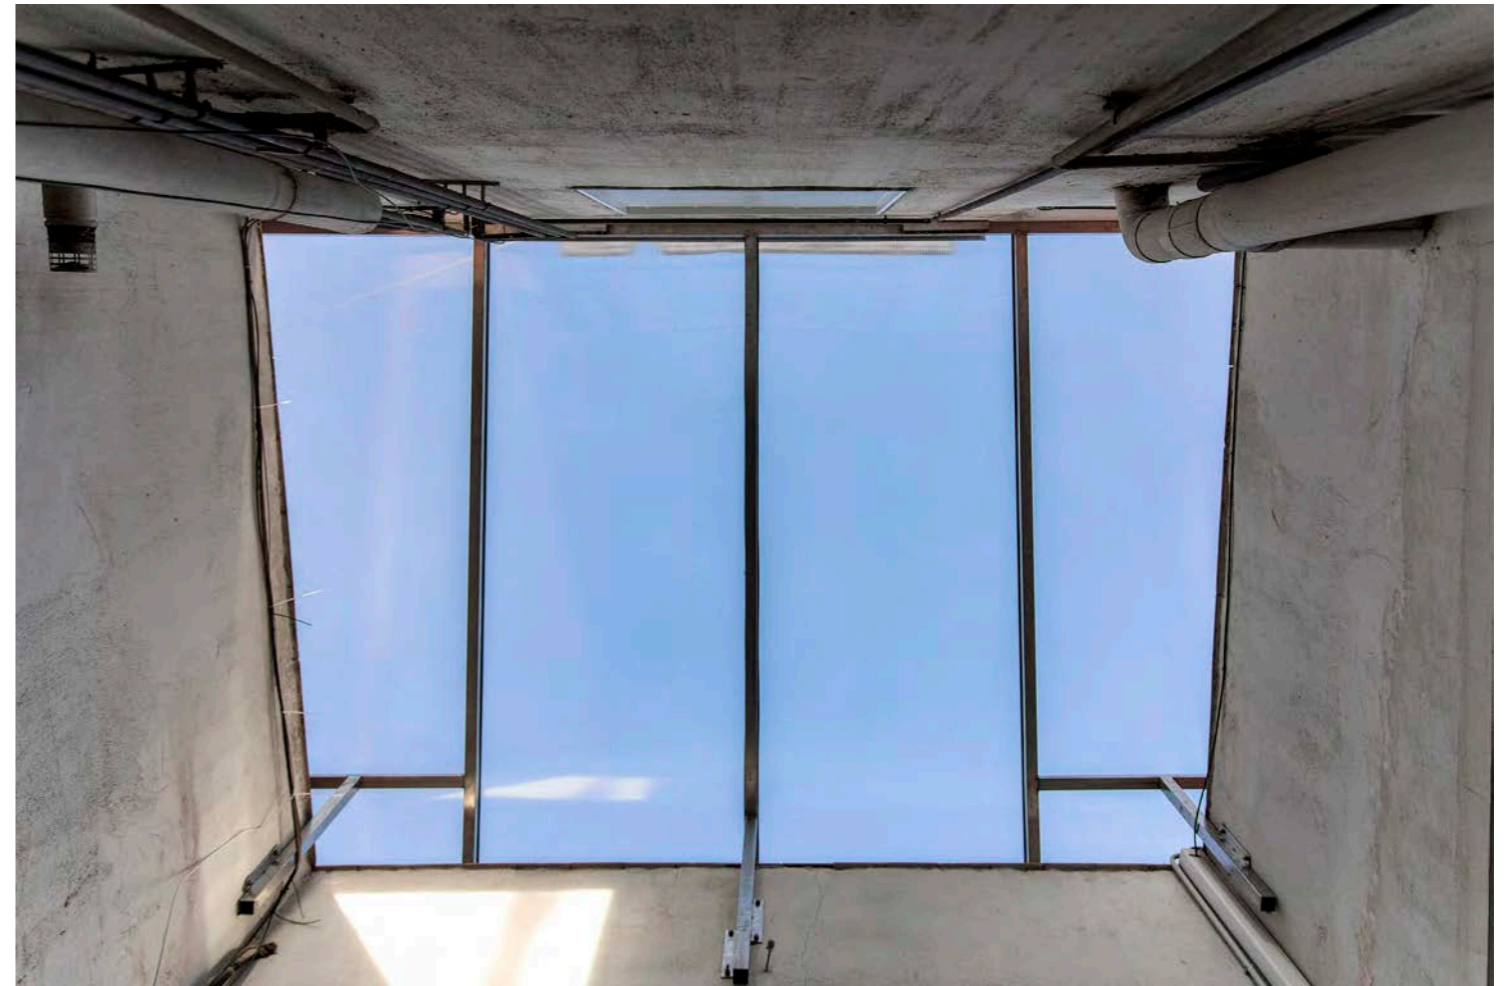

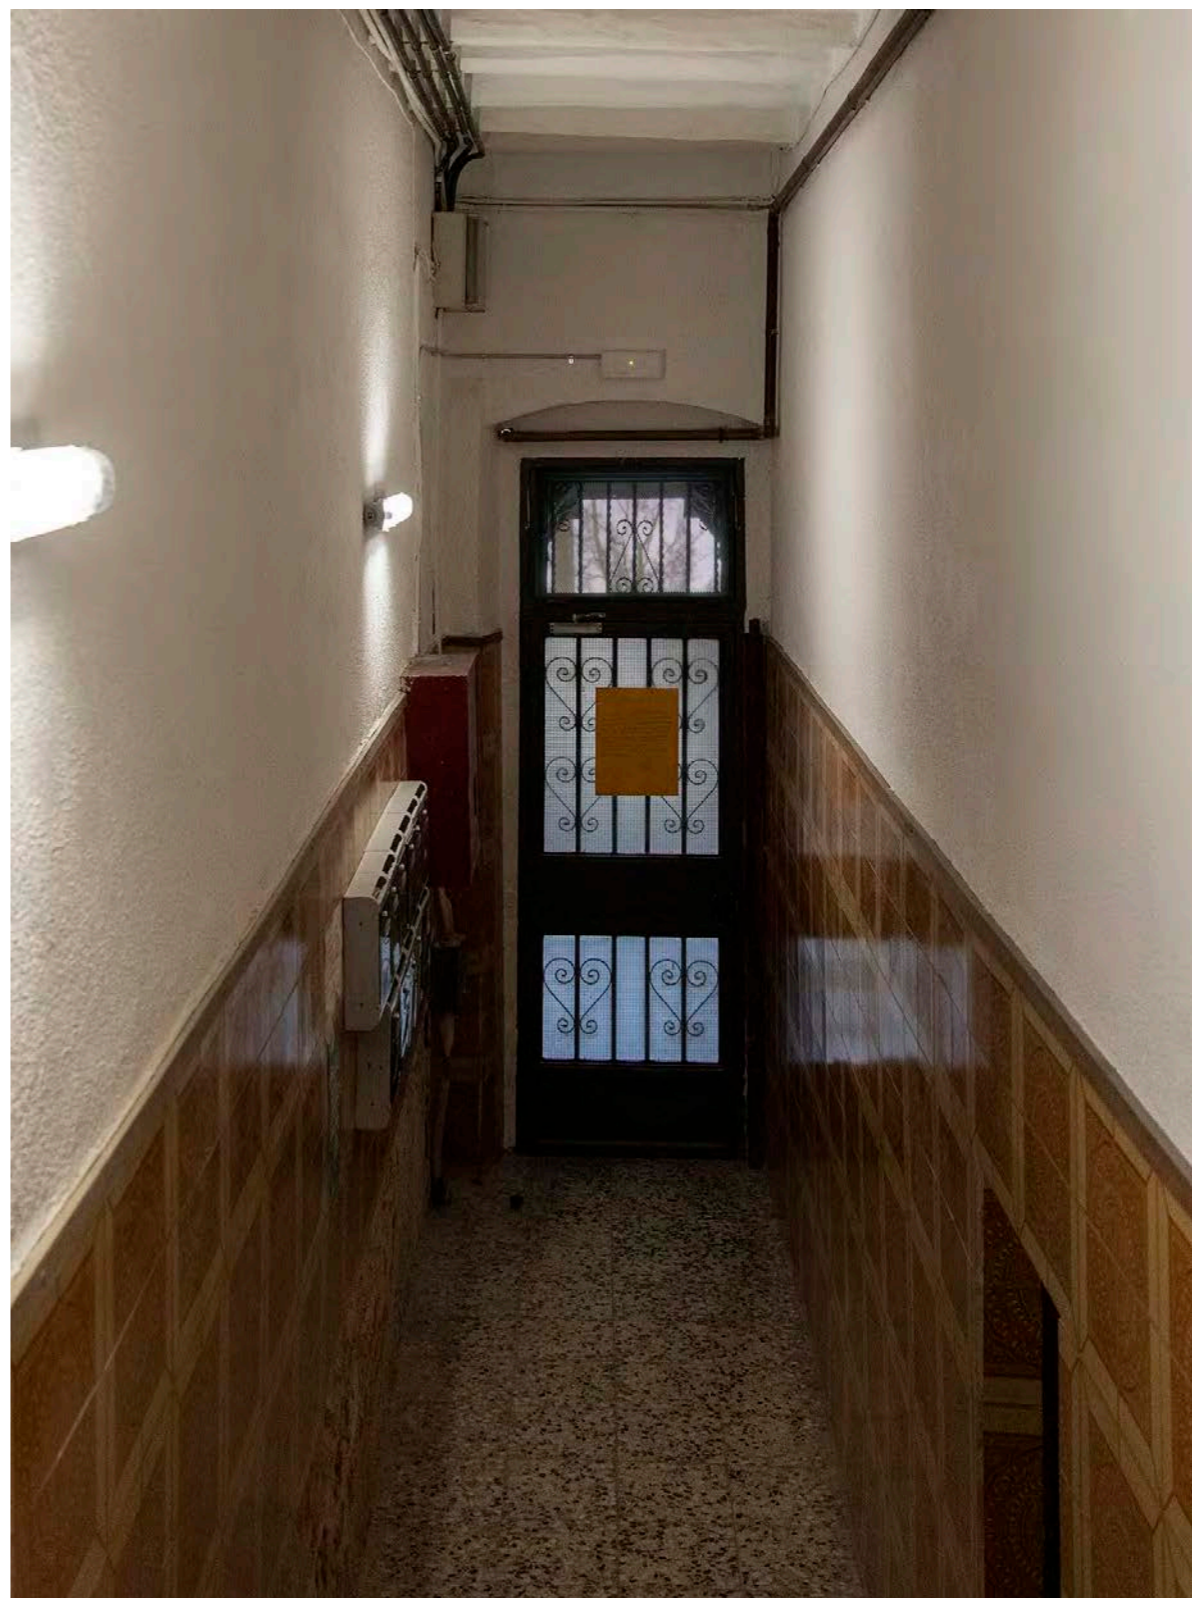

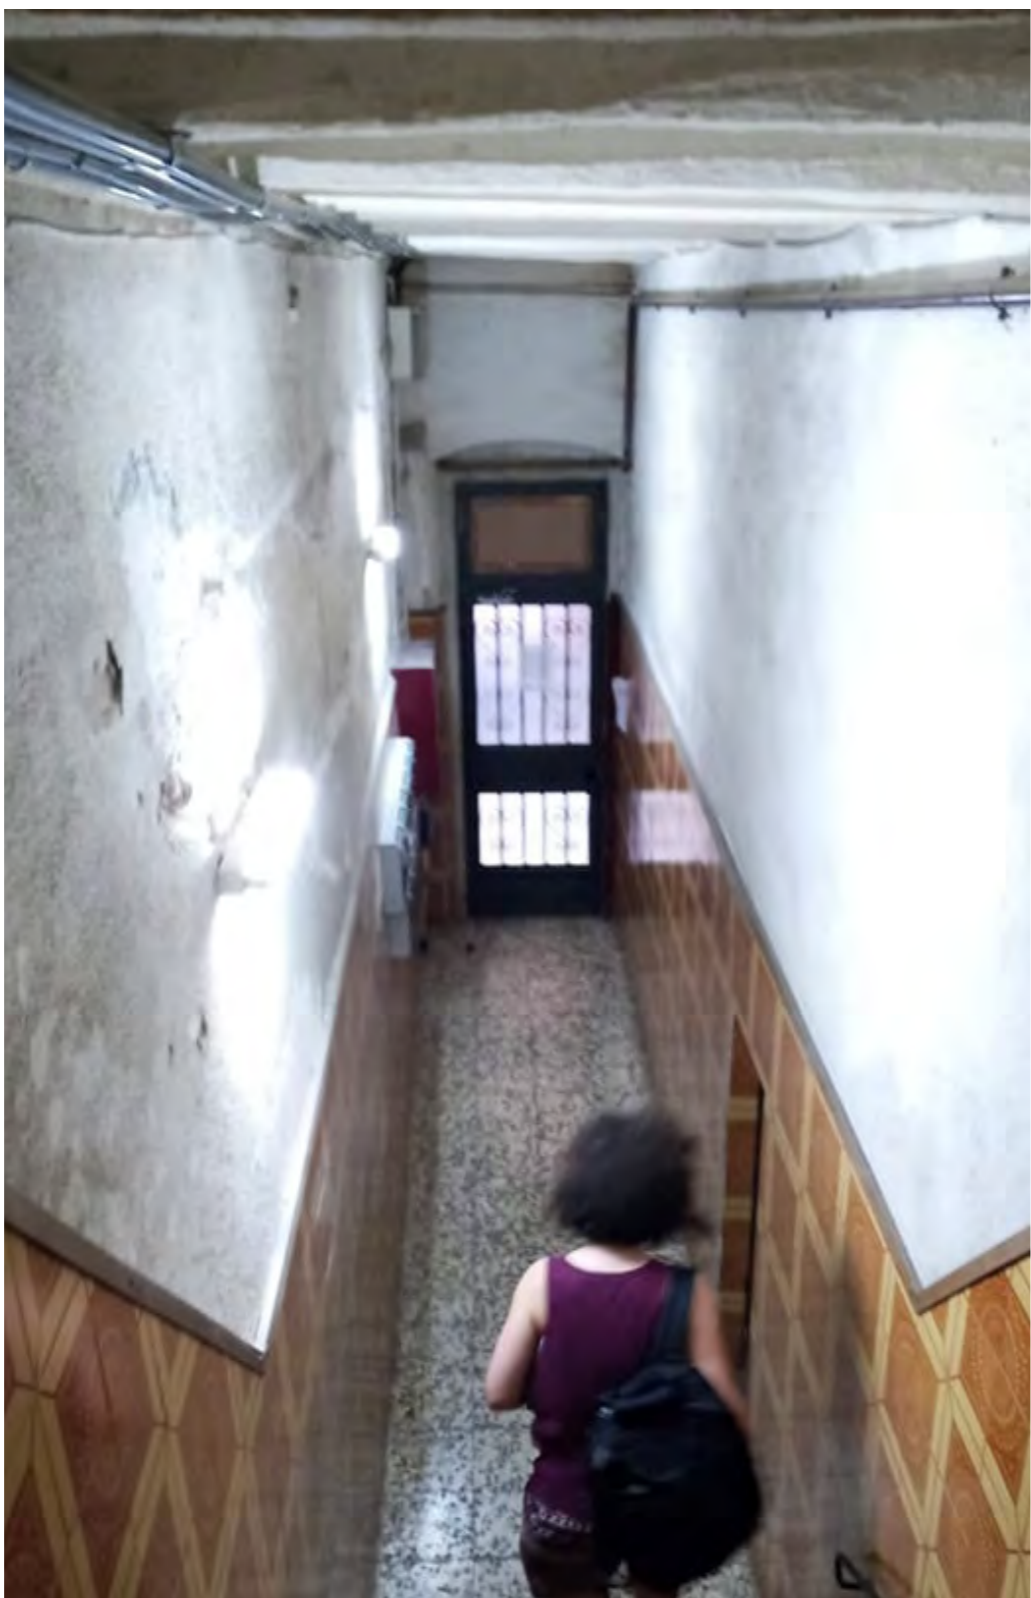

Light, interior air quality and sanitation, safety and sustainability in La Rambla del Raval and Sant Pacià interventions on the staircase.

Inclusion, safety, care and health, sustainability and resilience in Carretes, Peu de la Creu and Sant Pacià interventions on the rooftop.
